SIX 1BBO

Real-Time Data Product with European Equities.

Product Benefits

Broad European coverage. More than 3,000 equities across the EU, UK and Switzerland.

Direct exchange data. Consolidated coverage from two primary exchanges and one MTF.

Easy integration. API-first delivery through the SIX Market Signal data shop.

Simple access. One-month free trial and no usage reporting.

Pay as you go. Flexible Subscription.

Frequency and Delivery

Real-time streaming. Continuous bid, ask and trade prices.

Flexible delivery. WebSocket streaming and API-pull through a cloud-based environment via the SIX Market Signal data shop.

SIX 1BBO Use Cases

Monitor markets and portfolios. Track portfolio exceptions and detect sudden price moves, spread anomalies, unusual volume and changing liquidity conditions real-time.

Build alerts and scanners. Alert when a holding crosses a price threshold, moves X% or experiences an unusual short-term movement. Market-event monitoring around investment assumptions.

Power digital displays. Create watchlists, charts, security views and current portfolio experiences.

Develop analytics. Calculate indicators, market breadth, contribution analysis, thematic baskets and indicative benchmarks.

Validate market context. Compare broker or execution prices with an independent real-time reference.

Event-driven Investment Response. During earnings, corporate news, macro announcements or market stress, see how material holdings are repricing as the event unfolds.

Target Users of SIX 1BBO

Retail Brokers, Fintechs, Robo and Digital Advisers, Trading Desks, Family Offices, Charting Providers, Asset- / Wealth-Managers, Retail- / Institutional Platforms, Index or Analytics Providers, and many more .
