Pages	1
Date	19.07.2013

Important Information

Dear Customer

In a blink of an eye thousands of orders are generated thanks to a breath taking low latency that sets new standards in Stock Exchange Trading. Additionally to high performance trading, SIX Swiss Exchange captures daily essential trade data, which is used by professionals in the financial industry to perform high-level analytics and to develop trading strategies and algorithms for automated trading applications. In order to fulfill your analytic needs, we offer a range of services to meet your information requirements.

Tick by Tick: The SIX Swiss Exchange Tick Data Service covers all equities traded on the Exchange including price and volume information for every trade. The service provides an end-of-day download file of the day's Order Book activity, including all trades, order insertions and deletions in Order Book securities for the last 3 months. It allows you to back-test your system, to rebuild the Order Book and provides the necessary data to understand the underlying liquidity in a security during a trading session.

Please note that the Tick Data Service is only available for registered participants of the SIX Swiss Exchange or corresponding SIX Exfeed customers.

For additional information on any of our Trade Data services, please contact the Customer Service Desk or your Account Manager on +41 58 399 24 45 or mail to data-services@six-swiss-exchange.com.

Best Regards,

SIX Swiss Exchange
