VAT is a global developer, manufacturer and supplier of high-end vacuum valves, multi-valve modules, edge-welded bellows, and related products and services. Vacuum technology is an integral part of advanced manufacturing processes applied in a wide range of end markets including semiconductors, displays and solar energy as well as general industrial applications. VAT's high-end vacuum valves are mission-critical components at the core of advanced vacuum-based manufacturing processes controlling and regulating vacuum pressure and gas flow. The manufacturers of semiconductors, displays and solar products rely on accurately controlled, high-vacuum and high-purity environments to cope with the increasing miniaturization and sophistication of electronic applications. VAT's high-end vacuum valves are a key enabler of the technological evolution in high-vacuum process technology, standing for zero particles, highest purity and reliability.
