

# **Implementation Guidelines for ISO 20022 Interbank Messages**

SIC and euroSIC

Recapitulations (camt.052)

## General notes

---

SIX Interbank Clearing reserves the right to modify this document, as the need arises, at any time without prior notice.

SIX Interbank Clearing reserves all rights for this document including the rights of photomechanical reproduction, storage on electronic media and the translation into foreign languages.

Although great care has been taken in the compilation and preparation of this work to ensure accuracy, errors and omissions cannot be entirely ruled out. SIX Interbank Clearing cannot be held liable for any decision made or action taken in reliance on the information in this document or for any consequential, special or similar damages.

If you detect any errors in this document or have any ideas or suggestions for improvements we would be extremely grateful if you would notify these by e-mail to **[operations@six-group.com](mailto:operations@six-group.com)**.

## About this document

---

### Target audience

The "Implementation Guidelines for ISO 20022 Interbank Messages" are addressed to all participants of the Swiss RTGS systems SIC and euroSIC, using the ISO 20022 message standard.

### Purpose

The Implementation Guidelines consist of a base document with general information concerning all message types and various module documents – one each per ISO 20022 message type, e.g. this document for the message type "camt.052" – with message-specific information, including information on the application-specific handling of individual elements. They specify the messages to be submitted to and delivered from the RTGS systems SIC and euroSIC in the ISO 20022 message standard.

### Amendment control

All the amendments carried out on this document are listed in an amendment record table showing the version, the date of the amendment, a brief amendment description and a statement of the sections concerned.

### Associated documents

Supplementary information to the Implementation Guidelines can be found in the reference documents listed in the Base Document.

## Amendment control

All the amendments carried out on this document are listed below, with the version, the date of the amendment, a brief amendment description and a statement of the sections concerned.

Version	Date	Amendment description	Section
1.0	01.01.2014	First edition	all
1.1	30.04.2014	No SWIFT FIN message for "Cancellation log for payments"	3.1
		New list type SYSREC	3.2
		New sections 3.4. 3.5 and 3.7 added	3.4, 3.5, 3.7
		New figure 8 added, Processing codes for cancelled payments changed	3.6
		Following elements changed:	4.2, 5
		<ul style="list-style-type: none"> <li>Rpt/TxsSummry/TtlCdtNtries</li> <li>Rpt/TxsSummry/TtlNtriesPerBkTxCd</li> </ul>	
		Following elements changed:	4.3, 5
		<ul style="list-style-type: none"> <li>Rpt/Ntry/CdtDbtInd</li> <li>Rpt/Ntry/BookgDt</li> <li>Rpt/Ntry/ValDt</li> <li>Rpt/Ntry/BkTxCd/Prtry/Cd</li> <li>Rpt/Ntry/AddtlInfInd</li> </ul>	
		Following element changed:	4.4, 5
		<ul style="list-style-type: none"> <li>Rpt/Ntry/NtryDtls/TxDtls</li> </ul>	
1.2	30.06.2014	Following element changed:	4.2
		<ul style="list-style-type: none"> <li>Rpt</li> </ul>	
1.3	01.12.2014	Missing messages added in list of element MsgNmld.	4.3
1.4	16.04.2015	Document name changed, Logo replaced, Wording adapted to the terminology of the RTGS platform.	all
		New section "Parties of a transaction".	3.9
	16.04.2015	Title page and colour scheme for tables and illustrations amended to comply with the new Brand Identity Guidelines.	all
		On list type SYSREC, as for list type ACCREC, a separate "camt.052" message is sent for each settlement account.	2, 4.2
1.4.1	19.09.2016	Publication as "Minor" version: For list type SYSREC list-specific definition added to sub-elements "page number" and "last page indicator".	4.1
1.5	30.11.2016	New use case/payment type "Viseca Settlement".	3.4

# 1 Overview of documentation structure

These Implementation Guidelines are modular in structure:

- The base document contains general information applying to all messages.
- The module documents – one for each ISO 20022 message type – contain message-specific information, including information on the application-specific handling of certain elements.
- For each Implementation Guideline, an XML schema (XSD) and generic XML sample messages will be published.

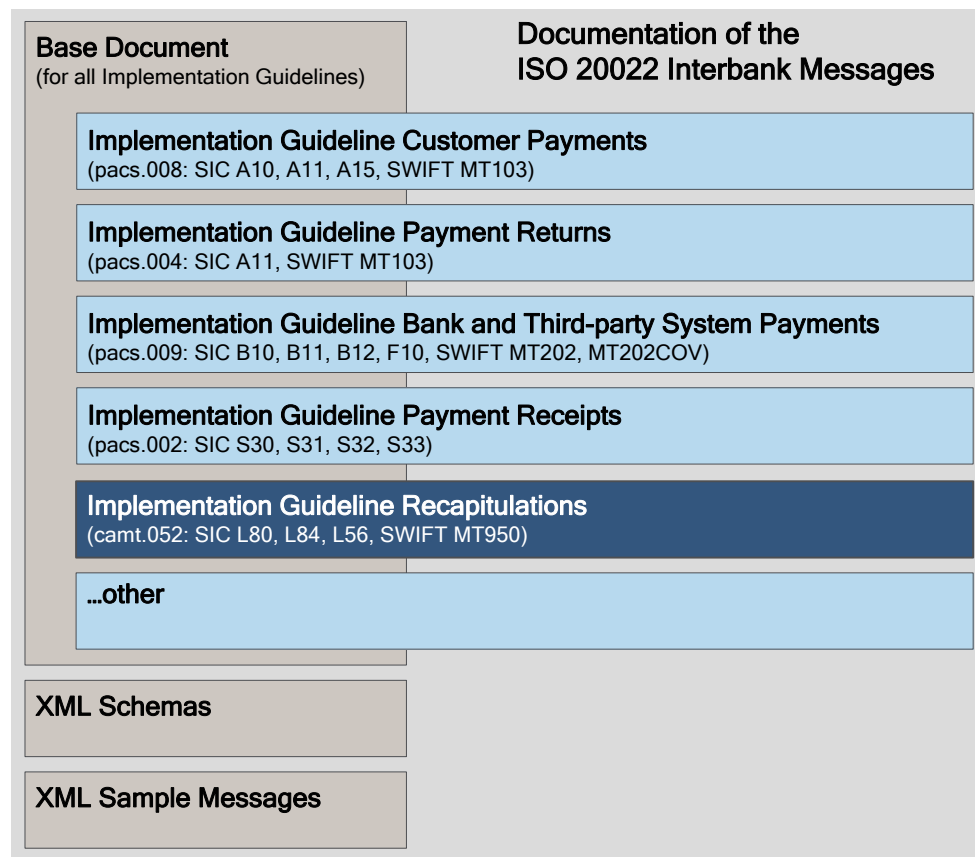

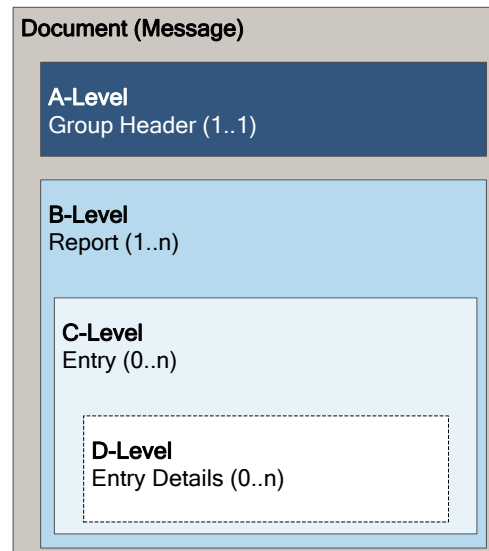

Figure 1: Documentation structure

## 2 ISO definitions

The "Bank to Customer Account Report" message (camt.052) is sent from the RTGS systems to the participants of the RTGS systems to ensure reconciliation of their own systems with the settlement account. It is based on the ISO 20022 XML schema "camt.052.001.02".

The "camt.052" message is essentially structured as follows:

- **A-Level:** Message level, "Group Header" element. This block must occur exactly once.
- **B-Level:** Account level, "Report" element. This block is used only once but may occur n times in the ISO definition.
- **C-Level:** Amount level, "Entry" element. This block is optional and may occur n times.
- **D-Level:** Amount details, "Entry Details" element. This block is optional and may occur n times.

Figure 2: Basic message structure of the "camt.052" message

## 3 Business specifications for the RTGS systems

### 3.1 Use cases

The "Bank to Customer Account Report" message is used for the following use cases in the RTGS systems:

Use case	Input/Output	SIC	SWIFT FIN	ISO 20022
Recapitulation for participants	O	L80	—	camt.052
Recapitulation for system managers	O	L81 <sup>1</sup>	—	camt.052
Recapitulation for third-party systems	O	L84	—	camt.052
Detailed recapitulation	O	—	MT950	camt.052
Cancellation log for payments	O	L56	—	camt.052

Table 1: Use cases for recapitulations using the "camt.052" message

### 3.2 List types

The use cases in the "camt.052" message are distinguished by specifying a list type in the <AddtlInf> element in the "Group Header".

List type	Code value	Use case
Recapitulation participants (consolidated)	ACCREC	Recapitulation for participants
Recapitulation participants (detailed)	DETREC	Detailed recapitulation
Recapitulation third-party systems	SVCREC	Recapitulation for third-party systems
Cancellation log	CNCREC	Cancellation log for payments
Recapitulation system manager	SYSREC	Recapitulation for system managers

Table 2: List types and their code value in the "camt.052" message

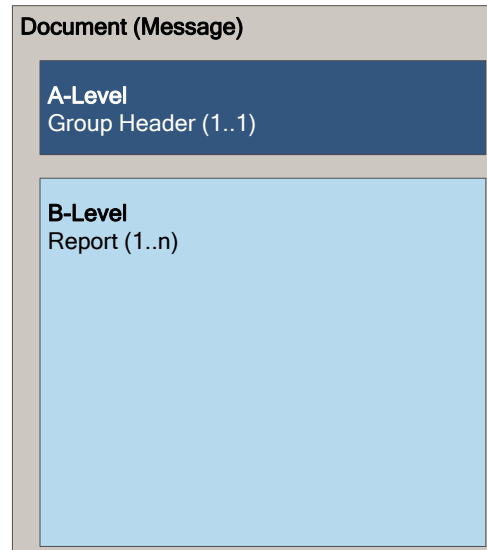

**Note:** In what follows in this document, the list types are always referenced using their code value.

<sup>1</sup> The list L81 is identical to the list L80. Therefore, in what follows, only the list L80 is mentioned.

### 3.3 Simplified message structure

The structure of the "camt.052" message essentially follows the structure of the ISO message.

However, for list types ACCREC and SVCREC, the following simplified structure is used:

- **A-Level:** Message level, "Group Header" element.
- **B-Level:** Account level, "Report" element.
- **C-Level:** Is not used.
- **D-Level:** Is not used.

Figure 3: Simplified message structure for the "camt.052" message for list types ACCREC and SVCREC

### 3.4 Names of payment types

Every payment in the RTGS systems is assigned a payment type. Depending on the use case and the message standard, the payment type is assigned explicitly by the participant or implicitly by the RTGS systems.

In ISO 20022 messages, the following codes are used to identify the use case and the payment type:

Use case/Payment type	Code value	Text belonging to the code value
ISR payment	ESRPMT	ISR payment
ISR payment resulting from a direct debit	ESRDEB	ISR payment resulting from a direct debit
IPI payment resulting from a direct debit	IPIDEB	IPI payment resulting from a direct debit
Outpayment order	OUTPMT	Outpayment order
SEPA payment	SEPPMT	SEPA payment
Salary payment	SLRPMT	Salary payment
General customer payment	CSTPMT	Customer payment
FI-to-FI payment	F2FPMT	FI-to-FI payment
Compensation payment	CMPPMT	Compensation payment
Cover payment	COVPMT	Cover payment
Sight deposit account transfer by the participant	PPTSD	Sight deposit account transfer by the participant
SECOM settlement	SECSTM	SECOM settlement
Eurex settlement	EUXSTM	Eurex settlement
Repo settlement	REPSTM	Repo settlement
Bancomat settlement	BCMSTM	Bancomat settlement
Tancomat settlement	TCMSTM	Tancomat settlement
EFT/POS settlement	POSSTM	EFT/POS settlement
Terravis settlement	STVSTM	Terravis settlement
Viseca settlement	VISSTM	Viseca settlement
Normal return payment	CSTRTN	Return payment in the CHF-RTGS
SEPA return payment	SEPRTN	SEPA-compliant return payment
Sight deposit account transfer by the system manager	SMTTSD	Transfer to sight deposit account by the system manager
Transfer from sight deposit account	SMTFSD	Transfer from sight deposit account by the system manager

Table 3: List of payment types and their codes in ISO 20022 messages

In the "camt.052" message, the payment types are delivered in the *BkTxCd/Prtry/Cd* element:

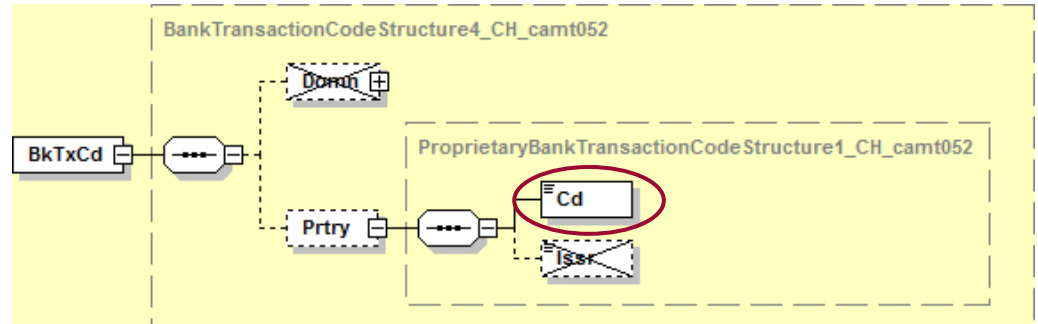

Figure 4: Delivery of the payment type in the *<BkTxCd><Prtry><Cd>* element

Different payment type-specific information is sent depending on the list type.

In list types ACCREC, SYSREC and SVCREC, a consolidated evaluation (number and total) is provided for each payment type in the *<TtlNtriesPerBkTxCd>* block:

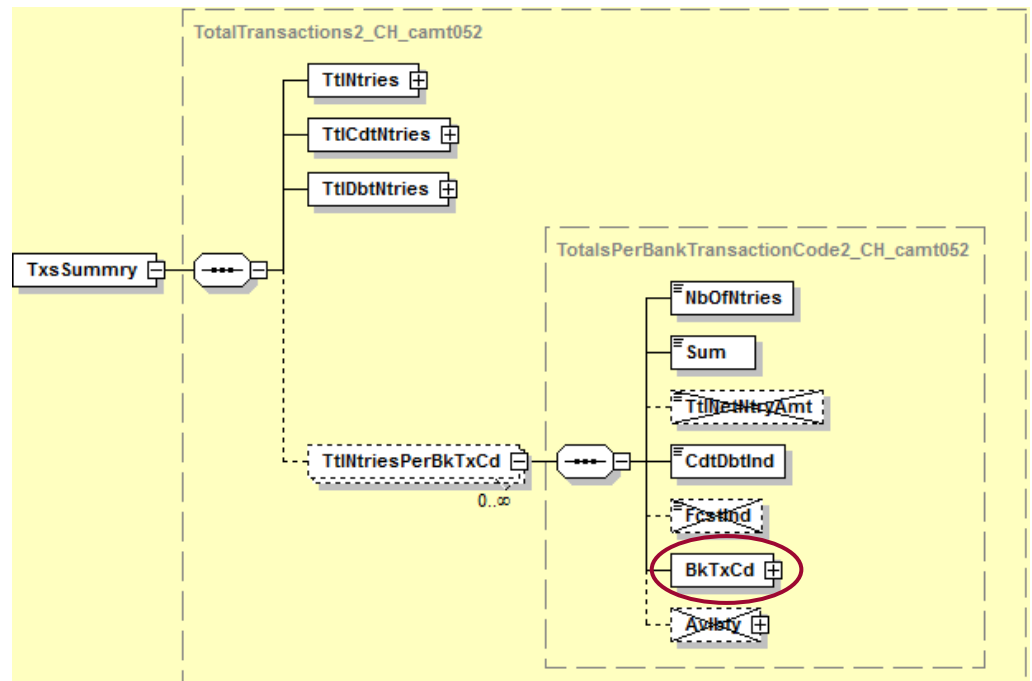

Figure 5: Delivery of the payment type in the *<TtlNtriesPerBkTxCd>* (ACCREC, SYSREC, SVCREC) block

In list types DETREC and CNCREC, the allocated payment type for each reported payment is delivered in the <Ntry> block:

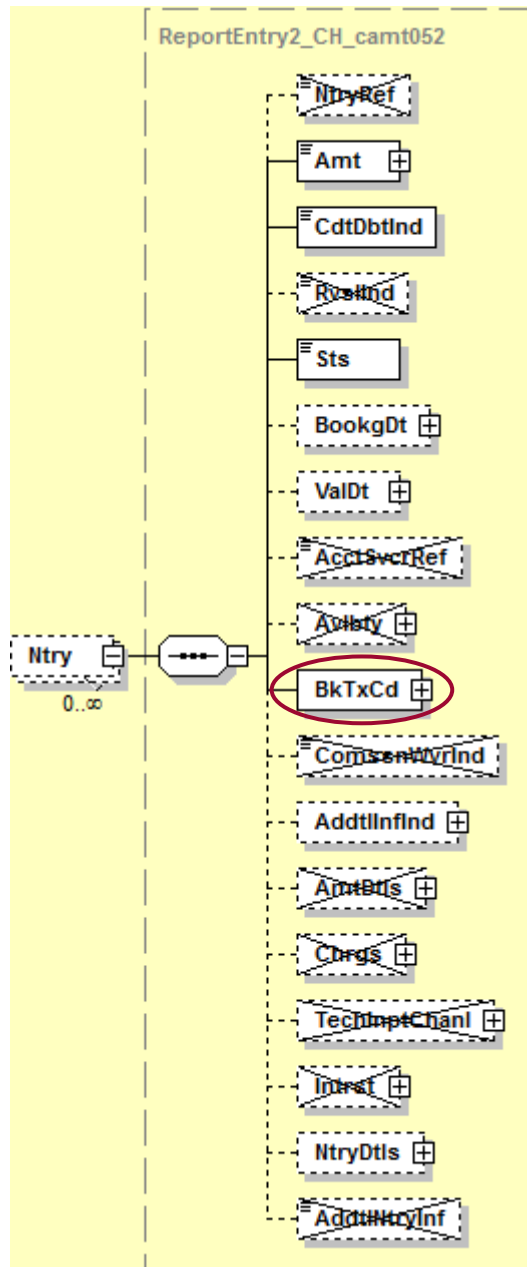

Figure 6: Delivery of the payment type in the <Ntry> (DETREC, CNCREC) block

### 3.5 Summary of transactions for the clearing day

In the "camt.052" message, a standardised summary of the reported transactions is delivered for all list types in the <TxsSummry> element. If lists continue for more than one page, this block is repeated on each page sent and always refers to the complete list.

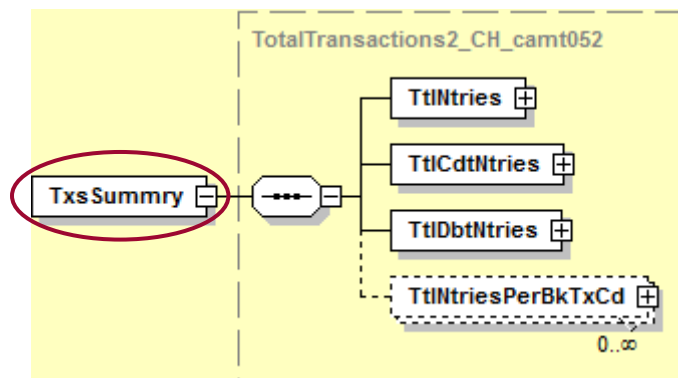

Figure 7: <TxsSummry> element: summary of transactions

In list types ACCREC, SYSREC and SVCREC, for each settled payment type a corresponding <TtlNtriesPerBkTxCd> block is created for incoming and for outgoing payments, if transactions of that type were settled on the settlement account during the reporting period.

### 3.6 Processing codes for cancelled payments

In list type CNCREC, the processing code in the *NtryDtls/TxDtls/ AddtTxInf* element provides information about the reason for the cancellation of the payment in question:

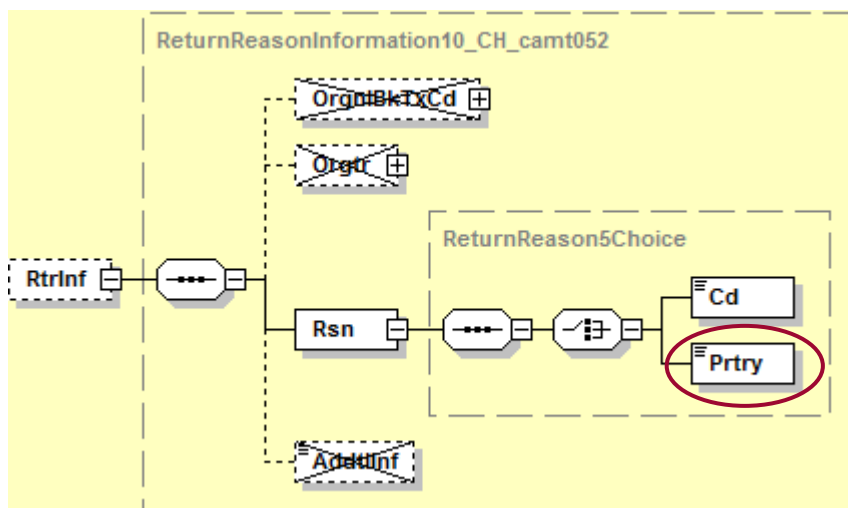

Figure 8: *<RtrInf> element: display of processing codes*

Code value	Reason for cancellation
PTTDY	Cancelled manually in wait file value date today
PTPVQ	Cancelled manually in wait file pre-value date
SYLTE	Cancelled due to cut-off (only in euroSIC)
SYDBC	Cancelled due to IID deletion
DPACS	Cancelled in wait file due to individual settlement or debit stop
DPLOF	Cancelled in wait file due to insufficient balance

Table 4: *Processing codes for cancelled payments*

### 3.7 Additional information about amounts

In the event of a liquidity reservation by the system manager, the balance of incoming and outgoing payments that is shown in the *TxsSummary/TtlNtries/TtlNetNtryAmt* element is not available to the participant in its entirety on the settlement account for the purpose of processing payments.

For that reason, with list types ACCREC, DETREC and SYSREC, information is provided in a *Rpt/Bal* block about the following amounts:

- Liquidity reservation by the system manager (only sent if it applies)
- Available account balance (is always sent)

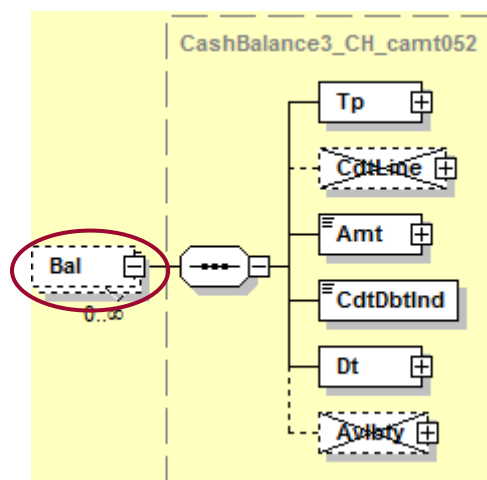

Figure 9: <Bal> element: additional information about amounts

The *Tp/CdOrPrtry/Prtry* sub-element informs as a code, which amount is sent in the following *Amt* sub-element. The following codes are defined:

Code value	Type of amount value sent
LQRSM	Liquidity reserved by the system manager
AVLBL	Account balance available for the participant

Table 5: Codes for identifying the amount values sent in the <Bal> element

### 3.8 Use of references

---

The following references are used in the XML message "camt.052":

- A-Level: *GrpHdr/MsgId* – unique reference of the "camt.054" message
- B-Level: *RptId* – consecutive number of the "Report" element within the message.

### 3.9 Parties of a transaction

---

In order to facilitate the reconciliation, the parties of a transaction ("*Transaction Details/Debtor Agent*" and "*Transaction Details/Creditor Agent*" elements) for the DETREC and CNCREC list types are always identified by the (unconcatenated) IID, regardless of the identification (IID or BIC) used in the submission.

### 3.10 SIC fields not provided in message type "camt.052"

---

Because the logic structure and system for ISO 20022 messages is different from SIC message types, information from SIC fields 75A and 76N is not included in the message type "camt.052".

Instead, this information can be obtained on demand by using the query functionality of the RTGS systems.

### 3.11 Acknowledging the message

---

The reception of a "camt.052" message must always be acknowledged with a "camt.025" message.

### 3.12 Further business specifications

---

Further business specifications can be found in the Base Document.

## 4 Technical specifications for the RTGS systems

### 4.1 Group Header (GrpHdr, A-Level)

The "Group Header" (A-Level of the message) occurs exactly once in the message and contains the following elements:

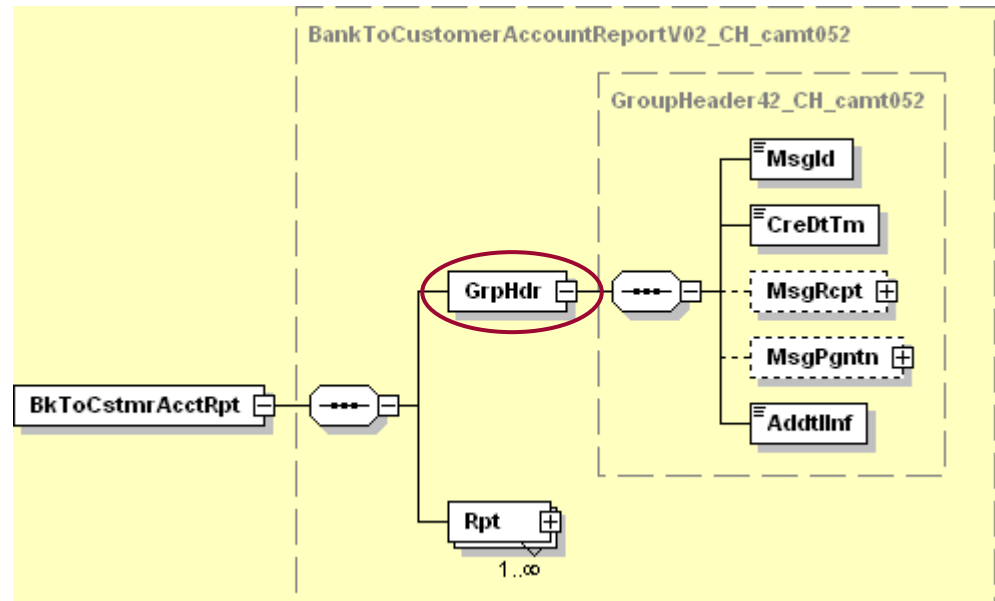

Figure 10: Group Header (GrpHdr, A-Level)

The following table specifies all the elements of the "Group Header" of the "camt.052" message that are relevant in the context of the RTGS systems.

ISO 20022 Standard			Swiss ISO 20022 Payments Standard

Table 7: Report (Rpt, B-Level)

### 4.3 Entry (Ntry, C-Level)

The "Entry" (C-Level of the message) contains information about individual transactions of the clearing day and will only be provided for list types CNCREC and DETREC.

However, the block is only sent if transactions were settled on the settlement account during the reporting period.

Figure 12: Entry (Ntry, C-Level)

The following table specifies all the elements of the "Entry" of the "camt.052" message that are relevant in the context of the RTGS systems.

ISO 20022 Standard			Swiss ISO 20022 Payments Standard

Figure 15: Example "camt.052" – list type DETREC – as full report printout

## Appendix A: XML schema and example

---

### XML schema

The XML schema for "camt.052" for the RTGS systems

- ***camt.052.001.02.ch.01.xsd***

is published on the SIX Interbank Clearing Ltd website.

It should preferably be opened using specific XML software.

### Example

The example shown in section 5 is published on the SIX Interbank Clearing Ltd website as an XML file:

- ***camt\_052\_Beispiel\_DETREC.xml***

### Validation Portal

The above mentioned example message as well as this implementation guideline, the XML schema and additional examples can also be downloaded from the SIC & euroSIC Validation Portal Interbank Messages (<https://validation.iso-payments.ch/SIC4>).

After successful registration users can upload their own messages and have them validated against this implementation guideline.
