Hachem Ohlale

Head of Analytics & Data Science

Synechron EMEA

Hachem Ohlale is the Head of Analytics & Data Science at Synechron EMEA. He has been working for 10 years in Financial Services for some of the largest banks and insurance companies on various data science and applied AI projects including Conversational AI, Natural Language Processing and Predictive Analytics. Within Synechron, he is also part of the Global FinLabs team, which is responsible for driving Synechron's innovation efforts in the FinTech space.

He was recently the global program lead for Synechron's most recent innovation program called InvestTech, which included the Synechron ESG Booster. Through his involvement in ESG and sustainable finance, Hachem wants to contribute to the sustainable transition of financial services and business as a whole. Hachem Ohlale completed his MBA from the RSM Erasmus University in the Netherlands.
