Financial Figures 2019 (1/3)

SIX continues to invest and lays the foundations for further growth

2019 Year-on-Year¹ 1,115.8 mCHF 1,129.7 mcHF Total 1.2% **Operating Income** -911.3 mCHF -916.2 mCHE Total **Operating** 0.5% **Expenses** 204.5 mCHF 213.5 mcHF **EBITDA** 4.4%

Year-on-year increase in total operating income was mainly due to strong trading result and higher income in the Business Unit Banking Services, offsetting effects of mid-2018 price reductions in all Business Units

Total operating expenses slightly increased after substantial investments in new products as well as expenses for regulatory projects. This was almost entirely compensated by efforts in enhancing efficiency in all business areas.

Accordingly, **EBITDA** grew by 4.4% to 213.5 mCHF compared to 2018.

- The steep year-on-year increase in share of profit of associates stems from the participation in Worldline.

 As an effect of the equity collar transaction, a contingent cash consideration with Worldline was waived, resulting in a one-time negative impact on net financial result.
- 3 EBIT and profit for the period from continuing operations increased mainly due to the positive contribution of the Worldline participation.
