

Allianz health care insurance coverage

After the conclusion of the insurance contract the insurance holder receives an identifier which facilitates his personal identification and provides the information on the scope of health services, which he is entitled to benefit from. The identifier is valid only accompanied by other document bearing a photography, which confirms the identity of the insurance holder. Before any medical appointment the medical staff will compare the personal data with the data provided by Allianz.

In order to benefit from any health services the insurance holder has to contact the medical hotline which is available 24 hours/day at the number 0801 807 806 or (022)458 70 95. Medical appointments are realisable after previous telephone appointment. Thanks to the telephone personal interview the hotline consultants are able to help the insurance holder to choose the best option available. Via the medical hotline you can:

- Make a medical appointment in any health centre in the country
- Book a medical appointment at home

All health services provided within the health care insurance coverage are non-cash services.

- Access to the health care of the highest quality in the network of over 200 private health centres all over the country.
- All health services are provided cash-free.
- Unique health care assistance package which includes medicines delivery, taking care of children and non self-reliant people during the hospitalization of the insurance holder, medical transport, health care information available 24 hours/day.
- Medical hotline available 24 hours/day for domestic customers, which provides the information on the medical centres contact details, working time and the scope of health services available in a particular health centre.
- Possibility to extend the scope of health services which may also include SDA (Single Day Admission) and medical rehabilitation.
- Possibility of covering the health insurance of the family members thanks to the family health care package.
- Identifier with the insurance holder's data , which enables the insurance holder to benefit from any health services provided by health centres – Allianz cooperating partners.
- No need of medical examinations after the conclusion of the insurance contract.
