# SIX Flex<sup>®</sup>

Data Discovery Made Easy

## Data Discovery Made Easy

What if you could access and see SIX data in one place? SIX Flex gives you a new way to experience the leading global reference and regulatory data from SIX.

The delivery platform is designed to allow for easy procurement, interpretation and day-to-day working with financial information.

Our data has never been so easy to discover, order and consume.

# Simply Access and Manage Just the Data You Need

## **Select Your Data Flexibly**

What if you could pick and pay for the data you need? SIX Flex allows clients to define their data consumption from among SIX premium data sources.

With a new, easy-to-integrate application, you can subscribe to data, define the delivery interval and analyze your data consumption and activities.

## **Remain in Control**

Your SIX Flex Administrator (e. g. procurement officer, head of market data) will be able to decide which content packages are to be activated for use by other internal SIX Flex users.

## **Rely on Advantageous Counters**

Whilst multiple users may create different subscriptions that include the same instruments SIX Flex will only count them once.

Where different content packages were requested for a same instrument, SIX Flex will automatically calculate the most advantageous commercial combination.

## **Pay for Relevant Content Only**

Packages have been designed to make the selection process easy and reduce the need for lengthy business analysis tasks.

Designed to meet the needs of everyday business activities, each package comes pre-loaded with all the data fields necessary for processing.

## **Understand the Data you Get**

Our intuitive dictionary provides descriptions for each available field, to inform you about the peculiarities and conventions used so you can ascertain your needs will be covered before ordering new content.

## **Trace Internal Usage**

An activity-log tells you which subscriptions were scheduled when and by whom, allowing you to unequivocally assign and spread data-related costs within your organization.

## Key Benefits

- Ease of integration
- Reduced cost of ownership
- Increased productivity through self-service functionality
- Support for data governance
- Enhanced business analysis capability
- Automated data supplier reporting

# Innovative Way to Consume Data

## Easily Ingest your Data

Using CSV flat file delivery, data integration costs will be kept at a minimum, whilst providing you with immediate access to the most recent additions triggered by regulatory and other market changes.

## Adapt Formats to your Needs

Define the fields you wish to preserve or drop, name and order them as you wish.

## What You See Is What You Get

Use Microsoft Excel's rich feature set to visualize data deliveries, sort data and search for specific elements.

## Define your Collection Preferences

Whether you wish to schedule file delivery once or several times a day, you can choose to fetch your files from a FTP-folder or download them through the user interface.

## Receive your Data Securely

Automate your integration process by subscribing to your requested data universe and retrieving your data via secure FTP.

### Remain on Top of Planned Changes

Published technical policies describing time to market rules for additions and changes, as well as specific data integration techniques will provide you with ample time to schedule those changes you wish to integrate, and otherwise shield you from undesirable business interruptions.

### Receive Relevant Notifications

Benefit from fully-integrated electronic communication channel: whether you are concerned by commercial, product or technical changes, remain informed at all times about changes that are relevant to your use of the product.

### Confidently Monitor Your Service

A dashboard showing all scheduled subscriptions and deliveries allows you to monitor operations. You can also be notified about any anomalies.

### Operate on Any Device Type

You can setup your subscriptions in the office on a Windows or macOS machine, and remain informed about the status by consulting the service on your mobile phone or a tablet, whether iOS or Android-based.
