

# Benchmark Statement

Nordic Index Family - SIX SRI Sweden Index GI (SIXSESRIGI)

The SIX SRI Sweden Index GI (SIXSESRI) was published on 2019-06-25 and the last update took place on 2020-12-11.

## 1 Description of the Market or Economic Reality

### 1.1 Description economic reality and geographical boundaries

The SIXSESRI index is constructed to reflect the market performance of all companies listed on the Nasdaq Stockholm Exchange that meet modern standards of social, environmental and ethical criteria where the concepts of sustainability and corporate responsibility are central. Excluding companies not following SRI standard. Only ordinary shares can be included in the index.

New companies are added when listed.

Gross dividends are reinvested.

SIX Financial Information (SIX) is the owner and Index Provider of the SIXSESRI. ISS ESG (ISS-ethix) is responsible for the screening process of the companies.

The start value for SIXSESRI is 100 with base date, 30 December 2014.

SIXSESRI is calculated in SEK.

### 1.2 Any other information deemed relevant by administrator for clients to understand features of the market

-

### 1.3 Derived indices

There are no derived indices.

## 2 Potential Limitations of the Benchmark Family

### 2.1 Circumstances where lack of sufficient input data leads to unreliable benchmark

If data which is necessary to determine the price or weight of an index component is not available to SIX due to trade suspensions or market distortions the latest available data is used. Such cases may lead to a deviation from the general principles of the indices defined in the respective methodology rulebooks.

Where SIX considers that the input data does not represent the market or economic reality that a benchmark is intended to measure, SIX will, within a reasonable time period, either change the input data or the methodology in order that the input data does represent such market or economic reality, or else cease to provide that benchmark.

### 2.2 Circumstances when accuracy and reliability of methodology can no longer be ensured

In case of structural changes of the market or economic reality or in cases where the interest in a market has diminished or is non-functioning, the reliability of a methodology can no longer be ensured. SIX reviews the methodology rulebooks at least annually to anticipate any such changes and mitigate its consequences by adjusting the methodology accordingly.

## 3 Controls and Rules for the Exercise of Expert Judgement

### 3.1 Elements of the calculation of the benchmark in relation to which discretion may be exercised

The rules for SIXSESRI have been designed to eliminate discretion or expert judgement for the benchmark calculation to the greatest extent possible. However, there might be unexpected events, such as complex corporate actions, structural changes

to the markets, or operational issues at Nasdaq Stockholm Stock Exchange, which require actions that are not described in the methodology rulebooks.

In such (unexpected) cases, a pre-defined Expert Judgement process has been established. SIX will evaluate and document the use of discretion as part of the Expert Judgement process. The goal will always be to update the respective methodology rulebook to capture these unexpected cases with a new transparent rule. In addition, any feedback from market participants about the use of discretion will usually be discussed in the upcoming Index Management and LLT meetings.

SIX ensures that the rules of the benchmarks are applied correctly and fulfil the required quality standards. SIX works against structured processes to ensure compliance with a regulatory framework. Further documentation on regulation and processes can be found on the SIX website:

<https://www.six-group.com/nordic-indices>

### **3.2 Criteria applicable to the exercise of such discretion and the position of each function or body that may exercise discretion**

See section 3 above

### **3.3 Steps of ex-post evaluation process on the use of discretion, and clear reference to the position of any person(s) who evaluates an exercise of discretion**

See section 3 above

### **3.4 Controls and rules that govern any exercise of judgement**

See section 3 above

## **4 Methodology of the Benchmark Family**

### **4.1 Rationale for adopting a benchmark**

The benchmark methodology used in SIXSESRI is designed to measure the market or economic reality described in section 1.1. The benchmark methodology is written using clear, transparent and concise rules, which makes it easy for the benchmark users to select the appropriate benchmark for their purpose.

### **4.2 Procedures for review and approval of methodology (including public consultation in case of material changes)**

SIX follows a structured and detailed process for benchmark methodology changes. A revised methodology must remain executable and result in an accurate and reliable representation of the economic realities of the interest the benchmark seeks to measure. Under no circumstances will SIX retrospectively change any of its rules and/or methodologies. SIX ensures that a change of methodology does not violate any of the requirements defined for developing a benchmark methodology and does not violate the minimum disclosure requirement defined for the content of the benchmark methodology.

Where feasible, SIX aims to consult on all material methodology changes with representatives of relevant clients and other stakeholder groups. A summary of the market consultations' comments and SIX' summary response to those comments will be made accessible to clients and stakeholders after any given consultation period, except where the originator of the comments has requested confidentiality.

A material methodology change comprises a change that "significantly modifies the procedures applied to the determination of a benchmark" and, therefore, the benchmark value compared to an unchanged scenario. Examples of changes that are considered material in their nature include changes in: Benchmark objective and the market it seeks to measure (e.g., market leader components vs. mid cap companies), benchmark component count, periodical review (determination) frequency, component universe and selection rules, weighting rules, introduction or removal of fast exit/entry rules, component replacement procedures, corporate actions treatments including merger and takeover treatments, and/or rebalancing rules.

Review and public consultation:

The validity of the index methodology is reviewed on an annual basis. SIX has a right to stipulate changes to the rules if necessary to maintain the purpose of the index or if any law, regulation or decision by an authority makes this necessary or if such a change is considered appropriate due to a change in market practice. In exceptional cases a broad market consultation can be conducted. The changes to the index methodology are publicly announced with an appropriate lead time.

### **4.3 Indication that factors (internal/external) may necessitate changes or cessation of BM**

Input includes, but is not limited to:

- Political and economic changes in markets;
- Internal feedback from staff members;
- External feedback from clients and other stakeholders;
- Feedback from Oversight Function.

## **5 Determination of a Benchmark**

### **5.1 Description of input data and priority given to different types of input data**

SIXSESRI uses traded prices (regulated data) from regulated markets (representing observable bona fide, arms-length transactions).

SIXSESRI specifies a single data input rather than a priority of inputs as no alternative source or data input is used.

### **5.2 Description of the input data, the source of the input data used, and the type of source of input data**

Direct data feeds of Nasdaq Stockholm Exchange to obtain regulated market data from the trading systems.

### **5.3 Minimum data needed to determine a benchmark**

In case of market distortion, updated prices for constituents corresponding to at least 30% of the benchmarks market cap value is needed to calculate a new benchmark value.

### **5.4 Models or methods of extrapolation**

Extrapolation is not used in the calculation of SIXSESRI.

### **5.5 Procedures for rebalancing**

The index is revised semi-annually. The cut-off date for eligibility to qualify for the index is the last trading day in April and October. Information regarding the new index population is published no later than 10 trading days after the cut-off date. Revision of the index population is implemented on the first trading day of June and December.

ISS-ethix examine the companies listed on the Nasdaq Stockholm Exchange and implements any exclusions. Any company that fails to meet the requirement for sustainable and responsible investment are excluded from the index. Companies involved in the verified violation of international standards regarding the environment, human rights, labour relations, anti-corruption legislation or the involvement in controversial weapons are excluded.

Companies with a turnover exceeding 5% related to the production or distribution, or 50% turnover for services related to alcohol, gambling, or military equipment are excluded. Companies with any involvement in the production or exceeding 5% in the distribution of tobacco or pornography are immediately excluded. Companies with a turnover of exceeding 5% related to services of pornography or 50% turnover for services related tobacco are also excluded. Additionally companies can be excluded for non-responsible behaviour, specifically in the areas of alcohol, tobacco or gambling and companies involved in the active distribution of pornography.

With regards to military materials, companies with a related turnover below 5% can also be excluded if the manufactured military equipment's primary purpose is to be used in battle or otherwise directly contribute to the combat function.

Requirements of sustainability include paying special attention to a companies' involvement in fossil fuels, coal, oil and gas, where a general exclusion is made for companies where 5% or more of turnover relates to the production or distribution of fossil fuels, as well as companies where over 50% of turnover derives from services in or to this area. The rules for fossil fuels also apply to exclusions of companies which are involved in the exploration for or extraction of oil sands, even if this amounts to less than 5% of the company's total sales.

## **5.6 Procedures which govern the determination of the benchmark in periods of stress or periods where transaction data sources may be insufficient, inaccurate or unreliable**

If data that is necessary to determine the price or weight of an index component is not available to SIX due to market distortions the latest available data is used.

## **5.7 Procedures for dealing with errors in input data including when a re-determination of the benchmark is required**

At SIX, an incident is opened and an incident manager is appointed and coordinates the work within the Index Operations Team at SIX as well as with other SIX departments. The incident manager will be responsible for documenting relevant information about the incident, but is not required to do so until the issue has been resolved.

The Index Management Team of SIX is informed about incidents as soon as possible.

Clients and other stakeholders are informed in a timely manner.

The details of incidents are discussed at regular meetings within the involved SIX departments. The meeting agendas ensures that common problems and possible sources of incidents are identified and recorded.

Errors in input data affecting the benchmark which are detected the same trading day are immediately corrected. Errors in input data affecting the benchmark that are older than one trading day are corrected if technically possible and appropriate.

# **6 Classification of benchmark**

## **6.1 Statement whether contributed/regulated data is used**

Regulated data

## **6.2 Statement whether benchmark qualifies as regulated data benchmark/interest rate/ commodity benchmark**

The benchmark qualifies as a regulated data benchmark.

## **6.3 Statement regarding non-significance of whole family (only non-significant, both significant and non-significant)**

Only non-significant

# **7 ESG Disclosures**

SIXSESRI takes into account environmental, social and governance (ESG) factors in the index design and pursues ESG objectives.

SIX does not administer any EU Climate Transition Benchmarks or any EU Paris-aligned Benchmarks.

The template for explaining how ESG factors are reflected in the benchmark statement for SIXSESRI can be found on the SIX website:
