The SIX Finland Index (SIXFIN) has been constructed to mirror the market performance of companies listed on the Helsinki Stock Exchange. SIXFIN is a capital weighted index which aims to reflect the market performance from a fund management perspective.

The SIX Finland Index is part of the SIX Nordic Index family which consists of Nordic indexes as well as individual country indexes. SIXFIN is calculated in three dividend versions (Price, Gross and Net) and are available in both capped and uncapped variants.

All listed securities are also divided into Large, Mid and Small cap segment indexes based on their market capitalization. These indexes are reviewed semi-annually, based on the prevailing market values.

**Index calculation**

New listings on the Helsinki Stock Exchange are included in the index calculation from the second listing day.
