

## SIX Nordic Index

Reflecting the performance of the Nordic stock exchanges.

The SIX Nordic Index (SIXNORDIC) has been constructed to mirror the market performance of companies listed on the Copenhagen, Helsinki, Oslo and Stockholm Stock Exchanges. It is a capital weighted index which aims to reflect the market performance from a fund management perspective.

### Index variations

The SIXNORDIC index family consists of Nordic indexes as well as individual country indexes. All indexes are calculated in three dividend versions (Price, Gross and Net) and are available in both capped and uncapped variants.

All listed securities are also divided into Large, Mid and Small cap segment indexes based on their market capitalization. These indexes are reviewed semi-annually, based on the prevailing market values.

### Index calculation

New listings on the approved Stock Exchanges are included in the index calculation from the second listing day. The share prices in the Nordic indexes are converted into EUR, while each country index is calculated in the local currency.

### Key Benefits:

- **Coverage:** SIX Nordic Index family covers all listed securities on the Nordic Stock Exchanges.
- **Objective:** The Index reflect the total market capitalization at the Nordic Stock Exchanges.
- **Transparency:** Freely available index rules.
- **Availability:** The index is calculated based on price and total return methodologies, both real time and end of day.

### SIX Nordic Index

### SIX Nordic Index

Period	Value	Change	Change %
1 Week	151.34	2.58	1.70
1 Month	150.50	3.42	2.27
3 Months	136.24	17.68	12.98
6 Months	123.14	30.78	25.00
1 Year	115.41	38.51	33.37
Year to date	133.90	20.02	14.95
