The SIX30 Index (SIX30) is owned and calculated by SIX Financial Information and constitutes a benchmark amongst indexes. SIX30 reflects the performance of the 30 most liquid shares listed on the Stockholm Stock Exchange. The limited number of constituents companies guarantees high liquidity and ensures the index’s suitability as a reference for derivatives and structured products.

### Index variants
SIX30 is calculated in three different dividend variants (Price, Gross and Net), and is available in both capped and uncapped versions.

### Constituent selection
The SIX30 indexes are revised semiannually. The selection process is based on the turnover during a six month period, beginning seven months before the rebalancing date. To limit the number of changes a new constituent has to be among the 15 most liquid shares to qualify automatically, while an existing constituent has to fall outside the top 45 to be removed automatically.

Both the population (the 30 most liquid shares) and the selection process make SIX30 an index with low transaction costs and high investability.
