

CONNEXOR® Terms for Data Vendors

CONNEXOR® Terms delivers a comprehensive set of reference data with a wide range of high-quality information across the entire life cycle of financial instruments.

The receiver of the data benefits from an increased efficiency and quality thanks to digitized and standardized high-quality reference data that is validated and captured by the issuers. Data vendors can thus provide their clients with reliable and detailed reference data directly from the source. Users of reference data such as financial institutions receive a comprehensive source of data, which at the same time facilitates the efficient management of data within their back-office applications and risk management systems.

CONNEXOR® Terms ensures that reference data is automatically and immediately distributed to all relevant market participants and distributors in a unified form and via standardized interfaces. The receivers and users of the data can easily be connected to the infrastructure based on the universal format XML, or use their existing SIX Exfeed Swiss Market Feed (SMF) connection for the reception of a defined subset of reference data (see scope of delivery for data attributes). As an alternative, ready-made csv files are available for download in the client area of the SIX Swiss Exchange Data Services Website.

For investors, this data is the ideal basis for establishing and implementing investment strategies. The standardized preparation of data increases the transparency, improves the comparability of financial products and provides an optimal basis for financial institutions and investors to make investment decisions.

Version 2.2 – 05/05/2017

NOTES – General Rules

Irrespective of the technical platform, source of reference data or interface, e.g. CONNEXOR® Terms, SIX Exfeed's SMF, SIX Swiss Exchange's RDI or Derivative Partners AG, the following general rules apply:

- Services offering delayed data (15") are not subject to Exchange fees, but they are subject to distribution fees and potentially to reference data fees on a per end-user basis for the full- or a subset of static data items except for the following 5 free attributes: The ticker symbol, the first/last trading day, the title short text and the trading currency for SSX SP traded instruments.
- A full month's fee is due for each calendar month in which the fee applies.
- The licensee may deliver reference data to subscribers/users free of charge during a trial period of thirty (30) days.
- All access to reference data must be controlled by one of the following units of count:
 - Terminal, device or application receiving data, or
 - Individual user authorised to access data (by means of a unique User ID and password), or
 - Individual security (defined as any data on a single instrument included in the data at the time of request)
- End-of-day (EOD) closing prices are free of charge and do not require a Data Distribution Agreement. End-of-day reference data updates that allow market participants to synchronise their internal databases with the daily traded instruments of the Exchange in readiness of the following morning are fee liable.
- Professional market-data distributors or market participants may not download, receive, re-distribute, re-sell or sub-license the reference data without SIX Exfeed's prior written consent. This includes, but is not limited to, reference-data deliveries via the Reference Data Interface (RDI) of the SIX Swiss Exchange Trading System, CONNEXOR® XML exports, data delivery via Derivative Partners Research AG, file transfers via FTP, SFTP, CSV or via the Swiss Market Feed (SMF). Except where explicitly stated otherwise, all data provided to distributors by SIX Exfeed is subject to specific terms and conditions of the Data Distribution Agreement (DDA).
- The stated fee amounts do not include sales tax. Services provided in Switzerland and Liechtenstein are subject to .
