Blockchain Data Innovation Framework

SIX Exfeed AG and BME Market Data (together "SIX") are committed to supporting innovation and the development of blockchain-native financial applications. This **Blockchain Data Innovation Framework** (the "Framework") defines the principles under which SIX may grant time-limited access to selected market data products for proof-of-concept ("POC") or testing purposes.

Scope

The Framework applies to data products:

– Delivered on-chain or through cryptographically signed off-chain mechanisms in service of initiating or executing on-chain actions;

– Used exclusively for the development or validation of blockchain-based applications;

– Requested and approved by SIX under the terms of the relevant Market Data Licensing Agreement (MDLA) or Data Distribution Agreement (DDA).

The Framework does not extend to commercial redistribution, production use, or any other delivery modes such as direct API access, flat-file delivery, or GUI portals.

Eligibility and Participation

To participate in a POC under this Framework, applicants must:

– Hold a valid MDLA with SIX Exfeed AG and/or DDA with BME Market Data.

– Submit a POC Application Form describing their intended use case and technical setup.

– Demonstrate that the data will be consumed in a controlled, verifiable manner (on-chain oracle or cryptographically signed delivery).

– Accept that participation is time-limited and subject to evaluation by SIX.

Duration and Evaluation

Each POC will be limited to a maximum of twelve (12) months. SIX may review progress and, where appropriate, extend, terminate, or convert the POC into a standard commercial license.

Transparency

This Framework is published to ensure transparency and equal access to innovation opportunities.

All interested parties may apply to participate under the same criteria.

SIX reserves the right to modify this Framework at any time, with changes published on https://www.six-group.com/en/market-data/data-services.html.

Participation

Interested participants may apply under the Blockchain Data Innovation Framework by submitting a completed POC Application Form to exfeed.admin@six-group.com at least three (3) business days before the start of the requested period. The application must briefly describe the intended blockchain use case, including:

– Purpose and on-chain role of the data

– Oracle or delivery mechanism

– Access controls and user/device management

Participants must hold a valid Exfeed MDLA and/or BME Market Data DDA with SIX. Technical documentation may be requested to support the evaluation.
