---

1) ESG scores are determined numerically as well as in letters, ranging from A+ (12) to D- (1). This document provides the numerical scores. A numerical score of 7 translates to a B-, 8 to a B, and so on.

2) Controversial weapons are defined as anti-personnel mines, cluster munitions, nuclear weapons, bio & chemical weapons, depleted uranium and white phosphorus (according to international treaties such as Ottawa Convention, Convention on Cluster Munitions, Treaty on the Non-Proliferation of Nuclear Weapons, Biological Weapons Convention, and Chemical Weapons Convention).

A) This information is currently not available from our ESG data provider. The data is either not collected or not available from the companies / issuers included in the respective benchmark. More information will be added as soon as it is available.

B) Coverage based on the constituents' weights, i.e. it shows the sum of weights for all constituents with a data point.
