Market Signal: Your Gateway to European Data Delivered via API

Market Signal is an API-based data marketplace that provides direct access to high-quality exchange data across European capital markets.

Combining real-time and historical datasets from SIX Swiss Exchange, BME and Aquis, Market Signal enables organizations and individuals to efficiently access, integrate, and scale market data through a single, flexible connection.

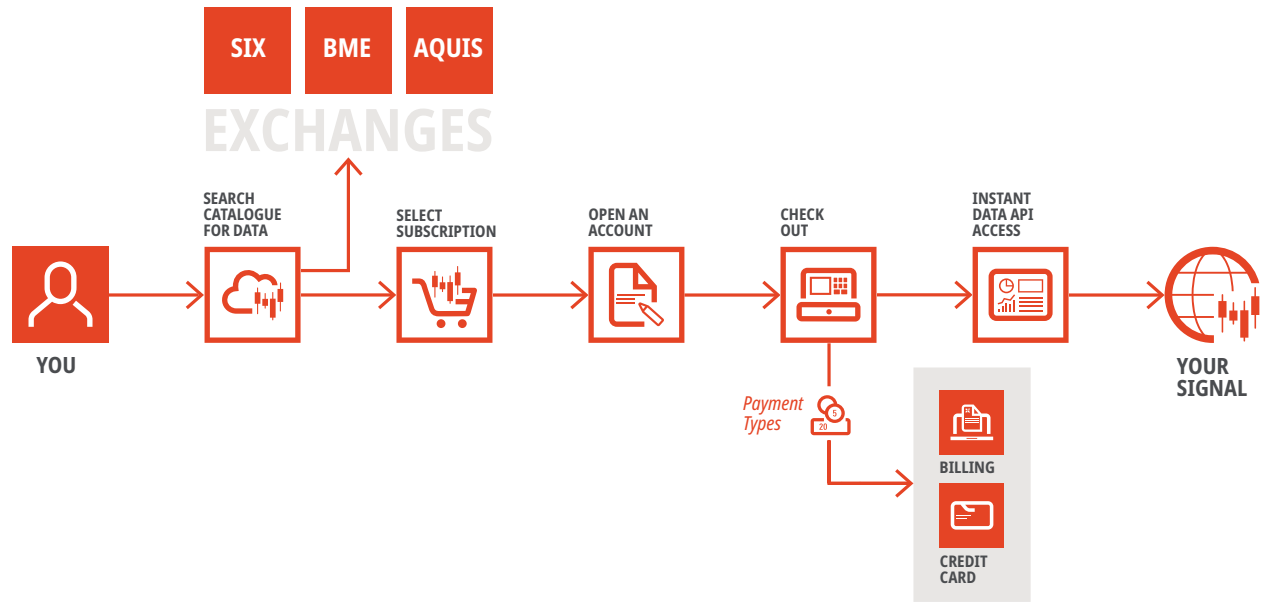

Designed for institutions, fintechs, and technical teams, Market Signal simplifies how market data is consumed, reducing complexity while enabling faster innovation.

Market Data: Tailored, Seamless, and Ready to Use

Market Signal enables access to real-time and historical market data through a single API connection, allowing users to quickly and efficiently integrate exchange data into their systems.

Its cloud-based, API-first approach removes infrastructure complexity and supports scalable data usage across a wide range of applications.

Find Your Alpha in This Unique Content Set

1BBO: A European Consolidated Market Data Stream

Key Features:

- Real-time Best Bid and Offer (BBO) data.
