Action required 

Dear Customer

Business continuity is about the continuation of business activities in case of emergency situations. It forms a significant part of SIX Group's company-wide risk management policy. Any threat to business continuity indicates a business risk requiring particular attention. Business continuity is closely linked to SIX Group's security policy. It fulfils strict data confidentiality and system availability requirements. Security precautions at SIX Group are continuously adapted to economic, organizational and technological changes. The foremost objective of business continuity is to sustain business processes and to minimize the impact of emergencies as much as possible.

To ensure the proper functionality of the SMF system, it is necessary to run some verification tests on a periodical basis; the next test will take place on Saturday, 21st July 2012.

On behalf of SIX Group, we kindly ask you to participate in this test. Please specify a responsible person with telephone no. and email address who will execute this test on your side:

Name	Telephone no.	Email address

The only activity on your side will be – in coordination with the SIX test coordinator – to connect 3 times to the SMF system by sending broadcast request messages.

The SIX test coordinator will be:

Name	Telephone no.	Email address
Mr. Urs Koller	+41 79 570 5322 (mobile) or +41 58 399 4727	urs.koller@six-group.com

On the following page you will find a provisional schedule and the activities to be done.

For more information please contact Data Services Customer Support:

Technical Desk: Tel.: +41 58 399 2445

Administration Desk: Tel.: +41 58 399 2977

Email: data-services@six-swiss-exchange.com

Test Schedule for Saturday, 21st July 2012:

Time (CEST)	Action
08:15	SIX test coordinator to contact customer's test coordinator informing about the first test step
08:35	Customer to send an SMF broadcast request message (using the same options as everyday) expecting any SMF broadcast reply message from the SMF system ("S6"), no trade or static data will be available.
09:45	SIX test coordinator to contact customer's test coordinator informing about the second test step
10:15	Customer to send an SMF broadcast request message (using the same options as everyday) expecting any SMF broadcast reply message from the SMF system ("S7"), no trade or static data will be available.
12:30	SIX test coordinator to contact customer's test coordinator informing about the third test step
12:45	Customer to send an SMF broadcast request message (using the same options as everyday) expecting any SMF broadcast reply message from the SMF system ("S6"), no trade or static data will be available.
14:00	SIX test coordinator to contact customer's test coordinator confirming the successful end of the test procedure
