Dear Customer

Based on SIX Swiss Exchange's decision to move the productive launch of the SWXess Maintenance Release 3 (SMR3) from 15th October to 5th November 2012 (see attachment), the implementation of **SMF** version 9.0 is rescheduled accordingly and will be done over the weekend 3rd / 4th November 2012, with **going-live on Monday, 5th November 2012**. The extended test phase resulting from this allows our vendors extra time to extensively test the changes.

The static data delivery for SMF version 9.0 including the board ID's for all SIX securities will take place on Sunday 4th November and will be sent as static data update messages (message type 5). The SMF channels (production) will be open between 10:00 and 14:00 CET. Such static data deliveries for SIX securities can be made available anytime during the test phase on request from the vendors.

We kindly ask you to confirm in writing your system readiness for SMF version 9.0 until end of week no. 41, i.e. Friday 12th October 2012.

Should you have any questions, please contact us.
