Action required 

Summary

Merge of the Nordic Indices to the Swiss indices in SIX MDDX®

- Member test environment 26 April 2021
- Production environment 31 May 2021

Dear Vendor

We are going to merge the Nordic Index instance "NORDIX" with the Swiss Index instance "IDX". That means that the Nordic indices will be delivered through the same MDDX service and source of the Swiss indices.

Please be informed about the latest amendments to tables 38 and 40 in the SIX MDDX Interface Specification. We will introduce the SIX Nordic Indices (package id:33) to the other existing service and source symbols of Swiss Indices.

Service	Source	Description	Date	Environment
NORDIX	NORDIX	SIX Nordic indices	24 April 2021 (deactivation)	Member test
SWIDX	IDX	Swiss Index platform	26 April 2021 (activation)	Member test
NORDIX	NORDIX	SIX Nordic indices	29 May 2021 (deactivation)	Production
SWIDX	IDX	Swiss Index platform	31 May 2021 (activation)	Production

This change will take place on 26 April 2021 in the member test environment and on 31 May 2021 in the production environment.

Yours sincerely,

SIX Exfeed Ltd
