Category SWXess Trading Platform

Authorized by Christoph Landis; Head Operations
Adrian Isler; Head Market Operations

Pages 2

Date 27.09.2012

Information 

In [SIX Swiss Exchange message no. 41/2012](#) of 24 August 2012, we announced the productive launch of SWXess Maintenance Release 3 (SMR3) as of 15 October 2012.

SIX Swiss Exchange has decided to move the productive launch of the SMR3 Release from 15 October 2012 to the previously published contingency date of 5 November 2012. The extended member test phase resulting from this allows us, our participants, ISVs and vendors extra time to extensively test the changes, particularly in the post trade area.

This message focuses on the new SMR3 implementation plan.

Date	Activity
3 - 4 November 2012	Migration to SMR3 in production
5 November 2012	First trading day with SMR3 in production

Regulatory changes

The functional changes of SMR3 also result in regulatory changes. The updated regulations, directives and guides were published on 19 September 2012 on the [SIX Swiss Exchange](#) and [Scoach Schweiz](#) website.

Due to the extension of the SMR3 member test phase, the applicable provisions of the regulations will only come into effect as of the new launch date, 5 November 2012. For a detailed overview of all of the adjustments with SMR3, please refer to [SIX Swiss Exchange message no. 47/2012](#).

Post-trade processing

We are pleased to offer participants the opportunity to test the post-trade processing further in the member test environment. We particularly recommend to validate that clearing and settlement is still instructed in accordance with your requirements for all trading segments after the migration to SMR3.

Please refer to section 5.1 of the document [SMR3 - Participant Readiness](#) which gives recommendations for the most important test scenarios.

Please contact us should you require assistance for the end-to-end tests of the post-trade processing.

More information about SWXess Maintenance Release 3 can be found in the [Member Section](#) of SIX Swiss Exchange.

We are continuously striving to extend and improve our trading platform so that you will benefit from the innovations and improvements resulting from SMR3, which guarantee you continued efficient trading..
