

SIX Swiss Exchange message no. 10/2026

Announcement of the Publication of Equinox Platform Specifications and Migration Guide

Category	Trading and products
Authorized by	Ingrid Acquaviva David de Bustamante
Pages	2
Date	19.03.2026

Information 

Content of this message:

- First publication of Equinox Platform Specifications
- First publication of the Equinox Migration Guide

SIX Group AG and its consolidated subsidiaries ("SIX"), together with SIX Swiss Exchange AG ("SSX") and Bolsas y Mercados Españoles ("BME"), is pleased to inform participants about the publication of the initial set of specifications for the Equinox Platform as well as the initial version of the Equinox Migration Guide.

Equinox Platform Specifications

The publication of the first set of specifications, which are relevant for the Equinox Membertest Version 1.0 are now published.

Specifications for the following interfaces are covered:

- Binary Trading Interface (BTI)
- Market Data Interface (MDI)
- Multi Dimensional Data FluX® (MDDX)
- Reference Data Service (RDS)

These specifications are available in the SSX and BME Member Sections in a dedicated Equinox area.

SSX: https://secure.six-swiss-exchange.com/member_section/equinox/manuals.html

BME: <https://rentavARIABLE.bolsasymercados.es/privada/en/equinox.html>

Equinox Migration Guide

The initial version of the Equinox Migration Guide is now published and provides information on the functional and technical changes for the Equinox Membertest Version 1.0. The Guide includes a clear, structured list of the functionalities that will be incorporated into the trading system with each planned upcoming version—an important element that helps participants understand which parts of the published specifications should be in focus currently and which areas continue to evolve. Throughout the project, this Guide will be enriched with more details regarding the migration, rollout, and testing phases for this and later Membertest versions, as well as the Production migration. The Equinox Migration Guide also refers to other useful documents and links relevant to the broader SSX and BME harmonization program.

The Equinox Migration Guide is available in the SSX and BME Member Sections and on the SSX public website.

SSX: https://secure.six-swiss-exchange.com/member_section/equinox/downloads.html

SSX: www.six-group.com/equinox

BME: <https://rentavARIABLE.bolsasymercados.es/privada/en/equinox.html>

The SSX and BME Member Sections contain a repository with all materials relevant for the Equinox Project. This currently includes:

- All project communications sent to date
- An FAQ document
- Various presentations
- NEW: Equinox Platform Specifications
- NEW: Equinox Migration Guide

Should you have any questions or requests, please feel free to contact us at SIXMigration@six-group.com.

We will continue to provide regular updates on progress and upcoming milestones.
