### **Eagle Investment Systems Enhances Enterprise Data Management Software with Telekurs VDF Loader**

**Telekurs is pleased to announce the availability of a standard interface between its Valordata Feed (VDF™) and Eagle Investment Systems' data management solution.**

Eagle's solution is an advanced data management platform that provides seamless connectivity and data integration from numerous sources and consolidates it in one location, providing a consistent, high-quality view of investment data. Consolidating security master data on Eagle's platform has provided significant benefits to clients, as it allows them to clean, enrich, extract and distribute data to meet diverse and dynamic internal and external reporting and information requirements.

"Eagle's data management solution provides the ideal staging platform for Telekurs VDF security data", said John Lehner, Eagle president. "The synergies of the software and the data provide our mutual customers with extensive benefits in terms of enhanced data quality and improved data processing.

The Valordata Feed delivers information from Telekurs' vast database of structured, encoded securities information. Covering over four million global instruments, VDF includes information about issuers, trading places, prices, underlying instruments, ID cross-reference, ratings, payment events, corporate actions and much more. As all of the information in the database is fully structured and encoded, this information – both current and historical - is linked together for superior processing results.

"In response to growing competitive and regulatory pressures, we're seeing global financial institutions putting a higher priority on their enterprise data management initiatives", said Barry Raskin, President of Telekurs (USA) Inc. "VDF delivers the breadth of information these global firms require, in a structure that promotes STP and in formats that facilitate communication. With the availability of an interface to Eagle's data management solution we believe that our customers will gain significant efficiencies and advantages through the combination of Eagle's excellent solution and Telekurs' unique data offering.

Eagle's interface for VDF is available globally. Customers should contact their local Telekurs office or Eagle investment Systems for more information.

Should you have any questions, please feel free to contact Stephan Meier, Media Relations.
