Zurich, Switzerland – SIX Telekurs, a leading provider of international financial information, has partnered with Zurich-based RepRisk AG to offer data on environmental and social risks in its flagship display product Telekurs iD.

Environmental and social risks pose a threat to the reputation of a company and often have devastating consequences for its financial success. SIX Telekurs' iD display product helps to manage these potential threats.

Thanks to the collaboration between SIX Telekurs and RepRisk AG, the leading provider of dynamic data on environmental, social and governance (ESG) risks, Telekurs iD now contains news and key data on the reputational risks faced by approximately 8,000 companies. This unique service is made possible by the RepRisk® data included at no extra cost in the Telekurs iD packages. The information contains valuable insights into companies which may represent a risk for investors.

“The collaboration with RepRisk will greatly enhance our product packages by offering ESG information that may significantly differ from the data published by companies themselves”, explains Dirk Schütt, Product Management, SIX Telekurs. “This can be a good indicator of the actual environmental, social and governance performance.”

RepRisk draws from independent third party sources including print media, news portals and online articles from over 700 NGOs as well as other independent websites, newsletters and blogs. It covers all major business languages.

Philipp Aeby, RepRisk's CEO, says: “We are very happy about partnering with SIX Telekurs and believe that the integration of our up-to-date sustainability data into Telekurs iD will give users a better understanding of the issues that could pose a financial, reputational or ethical risk for their investments or business relationships. There is an increasing awareness of the importance of including such extra-financial information in the analysis and investment decision-making process. Our data is a crucial contributory factor to making companies more transparent for investors, and ensuring compliance with internal and international standards.”

The display product Telekurs iD is an intelligent tool for financial professionals. This modular display service meets the needs of securities processing agents, investment advisors, wealth managers, risk managers and asset managers alike. With Telekurs iD, users can access the entire range of data from SIX Telekurs – from reference data and corporate information to news, and from the financial markets right through to investment product valuation and risk management tools.

SIX Telekurs is a SIX Group company. On a global scale, SIX Group offers first-rate services in the areas of securities trading, clearing and settlement, as well as financial market information and payment transactions. Further information is available at: www.six-telekurs.com

RepRisk AG

RepRisk is the leading provider of dynamic data on environmental and social risks for an unlimited universe of companies and projects. The company's web-based tool, RepRisk®, allows you to identify and assess the environmental and social issues which may present financial, reputational and ethical risks.

On a daily basis, RepRisk tracks a company's or project's environmental and social risk exposure by monitoring independent third-party sources including all major print media, over 700 NGO sites, governmental agencies and blogs. Controversial issues covered include environmental footprint and climate change, human rights and community relations, labor conditions and employee relations as well as corruption, fraud, executive compensation and other governance issues. In particular, all principles of the UN Global Compact are addressed. RepRisk covers news in English, Chinese, Japanese, Korean, French, German, Spanish, Portuguese, and Russian.
