1. Basis for the pricing model and invoicing

SIX x-clear AG (hereafter “SIX x-clear”) pursues an open and transparent pricing policy. SIX x-clear is committed to offering its services at competitive and cost-effective prices. The pricing model is based on the current pricing policy and is approved by the Board of Directors. SIX x-clear supports the Code of Conduct*.

*The European Code of Conduct on Clearing and Settlement is a voluntary self-regulation of the European stock exchanges, settlement agencies and central securities depositories (CSDs). See also <https://www.six-group.com/en/products-services/the-swiss-stock-exchange/post-trade/settlement-and-custody/info-center.html#scrollTo=code-of-conduct>.

1.1 General

Invoicing

SIX x-clear sends its clients a detailed invoice each month for the services used. All invoice amounts are indicated in Swiss francs (CHF). Clients have the choice between the direct debit procedure (bank account) and a debit of their registered cash account at SIX SIS or any other Collateral and Settlement Institution – in CHF, EUR, GBP or USD.

The pricing overview and the monthly invoice (report RPFE010) have the same structure. The fee code is indicated for each position, enabling participants to see at once what the position stands for. Manual bookings (RPFE070) and manual intervention fees/MIFs (RPFE075) are shown in detail on an ongoing basis in the monthly report. These items are mainly caused by market-specific services provided by third parties in connection with the processing of transactions or with other tasks executed abroad. They are passed on to clients.

Price details

Prices are set in CHF, basis points per annum/month (BP p.a., BP p.m.), per transaction, or in percent per annum, on the value of the financial volume under management and are quoted exclusive of VAT. One basis point equals 0.01%.

Client groups

In principle, for services with sliding-scale prices and rebates, the volumes of a client group are taken into account. At SIX x-clear, the following conditions must be met in order to maintain a client group:

Institutions must have a parent company/subsidiary relationship or be part of a holding company and these participations must be consolidated in the same group financial statements.

Price list of SIX x-clear AG

Valid as of 1 July 2026

In calculating prices, this has the following impact:

- when granting a volume rebate, all relevant volumes (e.g. custody account assets, transactions) of the group are taken into consideration, i.e. rebates are granted based on the group volumes.
- Volume-based prices apply based on the group volume.

Business Partners that are not part of a group will be treated as an individual client accordingly. The volumes of Non-Clearing Members (NCM) are already consolidated at the level of the top-level Business Partner, meaning a client with an NCM will benefit, for example, from volume rebates that are granted to the entire client group.

Third-party fees

The sections for the individual services also list the associated third-party fees, which are passed on to clients as necessary. In general, the fees listed are so-called “out-of-pocket” fees, which are passed on to clients in full. In some cases, flat rates may apply.

1.2 Rebate models (individual service level)

SIX may charge flat rates or uniform prices for services provided. In addition, SIX has established two kind of tiered pricing systems, enabling participants with higher volumes to benefit from volume discounts.

For one, a volume-based price (or rebate) model structured as a **continuous sliding scale**, where each level of the sliding scale must be passed through. Secondly, a volume-based price (or rebate) model structured as a **discontinuous step scale**, where the achieved volume defines the applicable price across the entire volume.

A) Continuous sliding scale price or rebate models

Volume-based price or rebate models in the price lists of SIX SIS and SIX x-clear AG may be structured as a **continuous sliding scale** price or rebate models. With this model, each level of the continuous sliding scale must be passed through i.e., the price (or rebate rate) only applies to the volume at the respective level. The average rebate rate/price applied is shown on the invoice.

Example of continuous sliding scale rebate

In the event of level 3 being reached for the total volume:

1. No rebate is granted for the volume at level 1.
2. For the volume at level 2, the rebate valid for level 2 is granted.
3. For the volume at level 3, the rebate valid for level 3 is granted.
4. (No volume in level 4 or above)

Price list of SIX x-clear AG

Valid as of 1 July 2026

B) Discontinuous step scale price or rebate models

Alternatively, volume-based price or rebate models in the price list of SIX SIS and SIX x-clear AG may be structured as **discontinuous step scale** price or rebate models. With this model, the achieved volume defines the (one and only) applicable price across the entire volume. The applicable price / rebate rate is shown on the invoice.

Example of a discontinuous step scale pricing

In the event of level 3 being reached for the total volume:

1. Pricing as per level 1 volume is not applicable.
2. Pricing as per level 2 volume is not applicable.
3. As total volume of volume level 3 threshold is reached (respectively exceeded), pricing as per level 3 is applicable across the entire volume.
4. (As the volume achieved is below level 4, pricing as per level 4 volume [or higher] is not applicable.)

2. Membership fees

Membership contributions are charged on a monthly pro rata basis for each Member ID that is actively set up in SIX x-clear 's clearing system. The contributions for Non-Clearing Members (NCMs) are charged to the respective General Clearing Member (GCM).

Designation	Type	Rate in CHF p.a.	VAT	Code
Clearing membership fee (SIX x-clear)	ICM	27,500.00	0.00%	1000
	GCM	27,500.00		
	NCM	4,250.00		

3. Clearing transaction fees

3.1 Cash products

For clearing transactions of cash products, Members of SIX x-clear benefit from an attractive continuous sliding scale pricing model as per the table below. For this pricing, the entire equity clearing transaction volume of the member's client group is always considered (i.e. including any "new business" resulting from trading-venue flows migrated to SIX x-clear).

Designation	Rate in CHF	VAT	Code
Clearing transactions: equity (SIX x-clear)	According to monthly volume as per below table	0.00%	1100

Tier	Monthly clearing transaction volume		New pricing Fee per transaction (in CHF)
	From	To	
1	1	150,000	0.0600
2	150,001	500,000	0.0200

Price list of SIX x-clear AG

Valid as of 1 July 2026

Tier	Monthly clearing transaction volume		New pricing
3	500,001	5,000,000	0.0050
4	5,000,001	and above	0.0005
Terms of the new business discount		Discount of 25% on applicable average transaction price as per above table	
Duration of new business discount		For a period of two years after migrating new trading-venue flows to SIX x-clear	
Prerequisites for new business discount		New volume from the migration of new trading-venue flows to SIX x-clear	

Taking the entire client group volume, every tier of the above pricing model has to be passed through to compute the applicable average transaction price. The applicable average transaction price is then applied across all clearing transactions of the Member.

Members will benefit from a 25% discount on the applicable average transaction price (new business discount) on any "new business" resulting from trading-venue flows migrated to SIX x-clear.

Please see the following example for easy reference:

- *Input assumptions: total client group volume of 3.5 million clearing transactions, broken down into existing volume of 2.5 million transactions and "new volume" of 1.0 million transactions*

- *Calculation of applicable average transaction price:*

Tier 1:	150,000 trx at CHF 0.0600 =	CHF	9.000
Tier 2:	350,000 trx at CHF 0.0200 =	CHF	7.000
Tier 3:	3,000,000 trx at CHF 0.0050 =	CHF	15.000
Total:	3,500,000 trx	CHF	31.000

Applicable average trx price = CHF 31.000 / 3,500,000 trx = **CHF 0.0089p/trx**

- *Calculation of transaction price including new business discount (i.e. resulting from trading-venue flows migrated to SIX x-clear):*

Trx price incl. new business discount = CHF 0.0089 x (1 - 25%) = **CHF 0.0066 p/trx**

- *Calculation of Member's clearing fee results:*

Standard clearing volume	Fee Code 1100	2,500,000 trx at CHF 0.0089 p/trx =	CHF	22.143
"New volume"	Fee Code 1100	1,000,000 trx at CHF 0.0066 p/trx =	CHF	6.643

4.4 Administration fee for buy-in

If settlements reach the buy-in date, SIX x-clear attempts to carry out a buy-in for the securities concerned. The administration fee for the buy-in is charged to the failing Member for each buy-in after it is carried out.

The failing Member is obliged to match the buy-in after execution and instruction received from SIX x-clear until the intended settlement date of the buy-in. Should the buy-in instruction not be matched by the failing Member by EOD on the intended settlement date, a late matching buy-in fee will occur. This late matching fee will be raised for each additional day on which the buy-in instruction remains unmatched.
