ServiceGuide SIX Repo AG

Product Specification for the CH Repo Market

1. Introduction

This document will show all details to the contract types that can be traded in the CH Repo market and provides related market and platform (CO:RE) informations.

SIX Repo AG reserves the right to add new contract types or remove contract types which have become obsolete at any time. SIX Repo AG will give one week's notice of any contract type changes.

Category	Description
Standard GC	Standardized contract types with a fixed term and a basket as collateral
Non Standard GC	Non-standard contract types with a variable term and a basket as collateral
Special	Non-standard contract types with a variable term and a security as collateral

2. Definition & Explanations

The following table gives definitions and explanations for the product terms and related terminology

Term	Definition/Explanation
Aggressor	Participant who responds to a Quote or Request for Offer (RfO) that results in a trade. For trades that result directly from an Order, both counterparties are considered aggressors.
Auto-hit	Indicates that an Order sent in response to a Quote will automatically be accepted. Auto-hit limits have to be set up on Trading Desk level and can be modified by any trader.
Basket	Contains a number of securities as specified by the basket owner. Baskets are used as collateral for General Collateral (GC) contract types. The collateral seller may additionally specify a security from the selected basket for delivery.
Business day	A business day is any day on which the market platform is open for trading. For more information, see the Trading and Settlement Calendar which is published on www.six-repo.com. See also currency business day.
Cash amount	The cash amount transferred from the cash lender to the cash borrower on the purchase date and from the cash borrower to the cash lender on the repurchase date.
Cash borrower	One of the two counterparties to a repo trade. Borrows cash and sells collateral. See also collateral seller.
Cash lender	One of the two counterparties to a repo trade. Lends cash and buys collateral. See also collateral buyer.
Cash lot amount	Indicates the increment by which the cash amount may be increased above the minimum cash amount.
CCY	trading currency
Collateral	Securities sold to the cash lender by the cash borrower on the purchase date and repurchased by the cash borrower on the repurchase date.
Collateral buyer	One of the two counterparties to a repo trade. Lends cash and buys collateral. See also cash lender.

Term	Definition/Explanation
Collateral seller	One of the two counterparties to a repo trade. Borrows cash and sells collateral. See also cash borrower.
Collateral type	Indicates whether the collateral is of the type basket or security. See also General Collateral (GC) and Special (SPC).
Collateral valuation	Indicates whether the collateral valuation, which determines the nominal amount of bonds or number of shares transferred in a repo, is negotiable or must be based on the collateral's market value on the purchase date.
Contract type	Sets out the terms of a given repo. A contract type is identified based on its trading currency and subcategory.
Currency business day	A currency business day is any day on which settlement in a specific currency is possible. Currency holidays largely correspond to national public holidays. For more information, see the Trading and Settlement Calendar which is published on www.six-repo.com. See also business day.
Day roll convention	Specifies whether the repurchase date will be rolled to the next or the previous currency business day if it happens to fall on a currency holiday. See also following modified.
DVP cut-off days	Only relevant for contract types with a variable (negotiable) purchase date. Indicates the minimum interval in currency business days between the trade date and the purchase date that must be observed. The purchase date cut-off time (where defined) applies additionally. For instance, if the number of DVP cut-off days is 1 and the purchase date cut-off time for the respective trading currency is 13:00 hrs, then the earliest possible purchase date is T + 1 (where T is the current business date), and the trade must be concluded by 13:00 hrs on the current business day. Concluding the trade after the purchase date cut-off time may be possible, if the purchase date is greater than T + 1 (see trade after cut-off time).
End to end convention	For monthly contract types (1M – 12M), the convention is to use the same date for the purchase and repurchase date (e.g. January 3 - June 3), unless the purchase date happens to be the last currency business day of the month. In this case the repurchase date will also be the last currency business day of the month (e.g. January 31 to February 28), if the end to end convention applies.
Evergreen (EVG)	Trade-level flag indicating that a repo's **repurchase date is automatically rolled at End of Day by +1 day**, keeping the original **term constant** (e.g., 30 days). When an Evergreen trade is **called**, the daily rolls stop and the trade continues as a **normal fixed-term repo** until repurchase. **Availability** is limited to selected contract types and is **not available** for **OPEN** or **INTRADAY** terms.
Fixed rate type	Rate is predefined and confirmed from both participants
Following modified	Day roll convention whereby the repurchase date is rolled forward to the next currency business day if it happens to fall on a currency holiday, unless the next currency business day falls into the next month, in which case the repurchase date is rolled back to the last currency business day prior to the currency holiday.
General collateral (GC)	Contract type where the collateral is a basket. The collateral seller may additionally specify a security from the basket for delivery. See also Special (SPC).

Term	Definition/Explanation
Indexed rate type	Rate fixings/calculations are based on the SARON index (see Chapter 7)
LSFF	Liquidity shortage financing facility. Monetary policy instrument used by the Swiss National Bank (SNB).
Margin ratio	The collateral-to-cash amount ratio. At 100%, the collateral amount provided by the collateral seller equals the cash amount in terms of the collateral's value. See also collateral valuation.
Minimum cash amount	The minimum cash amount that applies for a given contract type.
Minimum duration	Minimum interval between purchase date and repurchase date in currency business days.
No. of payments	Number of times a repo interest payment is made.
Non-aggressor	Participant who posts a Quote or Request for Offer (RfO) that results in a trade. See also aggressor.
Order	Binding offer sent to a selected participant. Orders are used to initiate trading activity directly with a specific counterparty or to respond to a Quote or Request for Offer (RfO).
Payable 1st date	The due date of the (first) repo interest payment.
Periodicity	The interval at which repo interest payments are made.
Purchase date (PD)	Settlement date of the repo's near leg. The purchase date may be pre-defined (e.g. T + 1 for overnight contract types where T is the trade date), partially defined (e.g. purchase date ³ T + 1), or fully negotiable.
Purchase date cut-off time	The time of day by when a trade must be concluded. Applies per currency to intraday, overnight, and any variable term contract type with a purchase date of T + 0 or T + 1 (where T is the trade date) or if the trade after cut-off time is set to no.
Quote	Generally non-binding offer sent to selected participants as specified by the participant to buy or sell a security at the quoted price.
Repo rate	Annualized rate of return on the cash amount (in %). For variable repos, a repo rate offset can be specified in basis points (bp). 1 basis point = 0.01%. See also repo rate type.
Repo rate fixing frequency	Determines how often the repo rate is adjusted with respect to the referenced index (only applies to indexed rate type repos).
Repo rate type	There are fixed and variable repo rates. The repo rate of fixed rate repos does not vary. The repo rate of variable repos varies in accordance with the index to which the repo rate is pegged.
Repurchase date (RD)	Settlement date of the repo's far leg. The repurchase date may be pre-defined (e.g. all fixed term contract types), partially defined (e.g. a minimum term of PD + 2), or fully negotiable.
Repurchase date type	Only applies to variable term contract types. Indicates whether the repurchase date must be specified in pre-trading and cannot be modified later (fixed), can be specified in pre-trading or remain unspecified until post-trading as agreed (negotiable), or cannot be specified until post-trading (open). See also terminable on demand.
Request for Offer (RfO)	Non-binding offer sent to selected participants as specified by the participant.
Right of substitution (RoS)	Determines whether the collateral seller has the right to substitute the collateral specified for different collateral of equal value and credit rating.
Right to Reuse	Determines whether the collateral seller has the right to reuse the

Term	Definition/Explanation
(RtR)	collateral specified.
Security currency	Currency in which the securities are denominated (bonds) or traded (equity).
Settlement type	Indicates the clearing and settlement conditions that apply for a given contract type, e.g. central counterparty or triparty.
Settlm. Org. CT Cat.	Settlement organization contract type category.
Settlm. Org. CT Ref.	Settlement organization contract type reference. Unique contract type identifier.
SNB contract type	Contract type set up for Swiss National Bank (SNB) monetary policy operations. For the terms and conditions that apply to SNB auctions, please contact the Swiss National Bank (SNB).
Special (SPC)	Contract type where the collateral is a security. See also General Collateral (GC).
Term	As in contract type term: contract duration from purchase date to repurchase date.
Terminable on demand (ToD)	Indicates whether the contract type is terminable on demand. If so, then it is possible to terminate the contract prior to the agreed repurchase date (in case of intraday contract types this means that the contract can be repurchased before end of business). If the repurchase date is not set, the contract must be terminable on demand. See also repurchase date type.
DVP	delivery versus payment
Standard GC	Standardized contract types with a fixed term and a basket as collateral
Non Standard GC	Non-standard contract types with a variable term and a basket as collateral
Special	Non-standard contract types with a variable term and a security as collateral

3. Standard Contract Types

Contract types with a fixed term are called standard fixed term contract's. Contract types with a variable term are called variable term contract's.

Within each category, contract types are uniquely identified based on their subcategory and trading currency.

The contract types available in the CH Repo market are categorized according to the following criteria:

Term	Collateral Type	
	General Collateral (GC) – Basket	Special (SPC) - Security
Fixed	X	-
Variable	X	X

3.1 Standard Fixed Term

Standard fixed term contract types are fully standardized. The only variable (negotiable) terms of the contract are the cash amount and repo rate.

Evergreen is **not** a contract type. It is a **trade-level flag** available for selected contract types (see **EVG** column in the tables). With EVG active, the **repurchase date** is **rolled forward by +1 day at End of Day** so that the **original term remains constant.** When an Evergreen trade is **called**, daily rolling stops and the trade continues as a **normal fixed-term repo** until repurchase. **Availability:** EVG may be offered on **Fixed Term**, **NON**, and **SPC** (where marked).

EVG is **not available** for **OPEN** or **INTRADAY.**
(See Chapter 8 for settlement handling references.)

Product Term details

Product Term	Collateral Type
Repo rate type	Fixed
Collateral type	Basket
Collateral valuation	Market value on purchase date
Central trading allowed	No
Periodicity	At end
No. of payments	1
Payable 1st date	Repurchase date
Settlement type	Triparty
Settlm. Org. CT Cat.	Standard GC

A full list of all standard fixed term contract types is given below.

3.1.1 SNB Standard Fixed Contract Terms

The Swiss National Bank (SNB) provides intraday (IN) and tomorrow intraday (TIN) liquidity available between 7:00 CET and 17:55 CET by posting Quotes in the following contract type:

Contract type ID	CCY	Term	Asset	Rate type	Min quantity	Cut-off	PD (T+X)	RtR	RoS	ToD	EVG	Margin ratio	Particularities
CH0008257112	CHF	IN	BOND	FIXED	1’000’000	16:45	0	X	-	X	-	1.1	-
CH0008257120	CHF	TIN	BOND	FIXED	1’000’000	17:55	1	X	-	X	-	1.1	-

3.1.2 SNB Liquidity Shortage Financing Facility (LSFF)

The SNB holds a special-rate repo auction from 18:00 CET to 18:15 CET on business days in the following contract type:

Contract type ID	CCY	Term	Asset	Rate type	Min quantity	Cut-off	PD (T+X)	RtR	RoS	ToD	EVG	Margin ratio	Particularities
CH0008257153	CHF	ON	SNBGC	FIXED	50’000	19:55	0	X	-	-	X	1.1	SPECIAL RATE

The ON SNB SPECIAL RATE contract type is also available for bilateral trading with the SNB between 8:00 CET and 17:55 CET on business days. For further information, please contact the Swiss National Bank.

3.1.3 SIX Treasury Standard Fixed Contract Terms (TRSY)

SIX Treasury provides intraday liquidity (IN) by posting Quotes for the following contract types:

Contract type ID	CCY	Term	Asset	Rate type	Min quantity	Cut-off	PD (T+X)	RtR	RoS	ToD	EVG	Margin ratio	Particularities
CH0008265112	CAD	IN	BOND	FIXED	1'000'000	17:55	0	X	-	X	-	1.2	-
CH0008265120	CHF	IN	BOND	FIXED	1'000'000	16:45	0	X	-	X	-	1.2	-
CH0008265128	EUR	IN	BOND	FIXED	1'000'000	17:10	0	X	-	X	-	1.2	-
CH0008265136	GBP	IN	BOND	FIXED	1'000'000	17:00	0	X	-	X	-	1.2	-
CH0008265144	NOK	IN	BOND	FIXED	1'000'000	14:30	0	X	-	X	-	1.2	-
CH0008265152	SEK	IN	BOND	FIXED	1'000'000	14:30	0	X	-	X	-	1.2	-
CH0008265160	USD	IN	BOND	FIXED	1'000'000	17:55	0	X	-	X	-	1.2	-

4. Non Standard Contract Types

Variable term contract types, which have a variable contract duration (with or without a minimum duration), are only partially standardized or fully non-standard.

The variable term contract type subcategories are based on the following criteria:

Criteria	Subcategory				
	NON STD	EQUITY NON STD	NON STD VAR	NON STD OPEN	SPECIAL
Abbreviation	NON	NON	NON	OPEN	SPC
Repurchase Date Type	Negotiable	Negotiable	Negotiable	Open	Negotiable
Repo Rate Type	Fixed	Fixed	Variable	Variable	Fixed
Collateral Type	Basket	Basket	Basket	Basket	Security

4.1 Non Standard Terms

Non Standard term contract types which have a variable contract duration (with or without a minimum duration) are only partially standardized or fully non-standardized.

Product Term details

Product Term	Details
Cash amount	Negotiable
Repo rate	Negotiable
Repo rate type	Fixed or Variable
Repurchase date type	Negotiable
Collateral type	Basket or Security
Collateral valuation	Market value on purchase date
Margin ratio	Negotiable (Min.: 0.0001%. / Max.: 999%)
Central trading allowed	No
Periodicity	At end
No. of payments	1
Payable 1st date	Repurchase date
Terminable on demand	Negotiable
Right to substitution	Negotiable
Trade after cut-off	Yes
Settlement type	Triparty
Settlm. Org. CT Cat.	Non Standard GC

ServiceGuide SIX Repo AG

5. Trading Currencies

A list of all supported trading currencies in the CH Repo market are listed below:

Currency Abbreviation	Currency name	Transaction shaping*
AUD	Australian dollar	AUD 100'000'000
CAD	Canadian dollar	CAD 100'000'000
CHF	Swiss franc	CHF 100'000'000
CZK	Czech koruna	CZK 2'500'000'000
DKK	Danish krone	DKK 700'000'000
EUR	Euro	EUR 100'000'000
GBP	British pound	GBP 100'000'000
HUF	Hungarian forint	HUF 2'800'000'000
JPY	Japanese yen	JPY 10'000'000'000
NOK	Norwegian krone	NOK 900'000'000
NZD	New Zealand dollar	NZD 100'000'000
PLN	Polish zloty	PLN 400'000'000
SEK	Swedish krona	SEK 900'000'000
USD	U.S. dollar	USD 100'000'000

*Repo transactions are divided into tranches (shaping) to limit the economic impact of settlement failures and to support an “all or nothing” settlement.

6. Baskets

Additional information on basket specifications on CO:RE

SIX Repo AG enabled Repo trading on CO:RE with US securities collateral. Generally, Securities are considered as US securities when they have an US tax domicile and if income (interest or dividend payment) from such securities would be subject to withholding and/or reporting under IRS regulations.

CO:RE currently facilitates trading in 3 distinct securities baskets, whose compositions is based on these broad distinctions, which are:

1. US treasury basket: fixed income instrument issued by the United States government
2. US corporate bond basket: fixed income instruments issued by corporations
3. US equities: constituents of the Standard & Poor’s 500 index

SIX REPO AG does not publish files with all eligible specific ISIN securities that can be delivered versus trading these baskets on CO:RE.

Nor does SIX Repo AG set any other eligibility criteria for determination of the content of these baskets.

The following table provides an overview of all available baskets in the CH Repo market.

Basket	Description	Basket Type	Security Currencies
SNB GC	SWISS NATIONAL BANK GENERAL COLLATERAL	Bond	CHF, DKK, EUR, GBP, NOK, SEK, USD

7. Indices and Exchange Rates

Following Indices are available for variable terms on CO:RE.

CCY	Benchmark Index	ISIN
CHF	SNB POLICY RATE*	CH1109218094
CHF	SARON	CH0049613687
EUR	ESTR	EU000A2X2A25
GBP	SONIA	GB00B6Z6W79
USD	TGCR	XD0490033566

*Index 'SNB Policy Rate' is only available for contracts in the SNB Market Segment.

All exchange rates applied for calculations performed on behalf of participants are provided by SIX Financial Information.

8. Settlement and Collateral Management

Straight-through-processing for settlement and clearing is provided through the Triparty Repo Service from SIX Securities Services and includes risk management and collateral allocation and substitution. All transactions are settled on a delivery-versus-payment basis.

For EVG trades, the triparty service **applies the daily roll of the repurchase date at End of Day** and returns **standard lifecycle confirmations**. When an EVG trade is

called, the daily roll cease and the transaction continues as a **fixed-term repo** until repurchase.

9. Market and Business Days

A business day is any day on which the market is open for trading. The market is open from Monday to Friday, except on holidays. For an overview of all market holidays, please see the detailed Trading and Settlement Calendar on: https://www.six-group.com/en/products-services/securities-services/securities-finance/info-center.html#scrollTo=trading-hours

Business Hours / Time (CET)	Event
06:00	Start of business day
07:00	Start of trading
18:15	End of business day
