

# SIX Cyber Hub

## Strengthening the cyber resilience of the Swiss Financial Center

No doubt, the Swiss Financial Center is under pressure. New competitors, new technologies, new regulations, but also new threats, particularly in the cyber security domain, have arisen in the past. SIX assumes thought leadership and is willing to invest into the cyber resilience of the Swiss Financial Center. Therefore, in 2018, SIX launches the SIX Cyber Hub, a sector-specific, interdisciplinary and multi-lateral initiative open to all institutions at the Swiss Financial Center. The aim of the SIX Cyber Hub is to strengthen collaboration, information sharing and digital trust.

### 1. SIX Cyber Hub

In 2018, SIX launches the SIX Cyber Hub, a sector-specific, interdisciplinary and multilateral initiative open to all institutions at the Swiss Financial Center. The aim of the SIX Cyber Hub is to strengthen collaboration, information sharing and digital trust.

#### Vision

The SIX Cyber Hub connects banks and insurances in Switzerland and empowers a concerted defense to the cyber threats of today and tomorrow.

#### Mission

To strengthen the resilience of the Swiss financial sector, the SIX Cyber Hub community builds capabilities in three domains:

- Complement our defenses with managed SOC services
- Advance security talent with training and education
- Broaden our expertise by sharing practical threat intelligence

This will be including community building efforts as well as commercial offerings. The SIX Cyber Hub is built on trust, physical and virtual interactions and strongly depends on the ability and the willingness to contribute and share information.

### 2. Managed SOC Services

SIX has built up the first cognitive 24/7 SOC of Switzerland. The SIX SOC is powered by IBM technology and is operated by SIX Security Analysts located onsite in Zürich.

As of January 2018, the SOC is live. In a next step, SIX plans to open up its SOC and share these capabilities with institutions of the Swiss Financial Center, focusing on banks and insurances as a Managed SOC Services Provider (MSSP).

As of Q2/2018, the SIX SOC will be ready to offer a Proof of Concept (PoC) for prospective customers and will go live with managed SOC services for customers in Q4/2018.

If you would like to learn more about Managed SOC Services get in touch with us: [mss@six-group.com](mailto:mss@six-group.com)

### 3. Your Participation

SIX invites all organizations of the Swiss Financial Center to enter a dialogue, drop ideas, start an exchange of thoughts:

[cyberhub@six-group.com](mailto:cyberhub@six-group.com)

#### Key Benefits

1. Complement the Swiss Financial Center defenses with managed SOC services
2. Advance security talent with training and education
3. Broaden our expertise by sharing practical threat intelligence
