Sustainability is Increasingly in the Spotlight

Sustainable Investments (SI)
SI are needed to transform both the Swiss and global economy to deliver on climate, environmental and social sustainability goals, including the Paris Agreement and more broadly the UN Sustainable Development Goals.

SI in Switzerland
The Swiss market for SI has experienced double-digit growth in previous years and reached CHF 1.52 trillion in 2020. Both the public and private sector work on framework conditions paving the way for Switzerland to become a premier international hub for sustainable finance, including sustainable bonds.

The Role of Bonds
Bonds as a major asset class play an integral role and the market for sustainable bonds is growing rapidly both due to bottom-up drivers (i.e. investor demand) as well as top-down pressure (i.e. pressure from company boards and upcoming regulations like the EU taxonomy or EU Green Bond Standard).

1. The figure covers SI funds (CHF 694.5bn), sustainable mandates (CHF 269.8bn) and sustainable assets owned by asset owners (CHF 555.9bn); based on a market survey by Swiss Sustainable Finance in “Swiss Sustainable Investment Market Study 2021”.
2. See e.g. the Federal Council report “Sustainability in Switzerland’s financial sector” (Jun-20) or the Swiss Banking Association position paper “Sustainable Finance” (Jun-20).
3. The EU Green Bond Standard is part of the EU Commission action plan on financing sustainable growth that also includes the formulation of an EU taxonomy, a classification system for sustainable activities.

Sustainable Bonds Are Globally on the Rise

Issue volumes of Green, Social and Sustainability Bonds are taking off

In 2020, most Green Bond issuances originated from government-backed entities...

European issuers are (still) leading in Green Bond issuances

...and most proceeds were channelled into clean transportation projects*

Source: CBI and Refinitiv (values in USDbn)

* Transport includes projects in clean energy vehicle infrastructure, electric transportation, emission reduction, etc.
1. Sustainable Bonds Are on the Rise
2. **Greater Visibility with the SIX Flag**
3. Partnership with the Climate Bonds Initiative
4. A New Opportunity – Sustainability-linked Bonds
5. Your Advantages at a Glance
Greater Visibility with the SIX Flag for Sustainable Bonds

- Status quo: **no global legal and binding definition** for green, social, sustainability or sustainability-linked bonds
- The «Principles» by ICMA\(^1\) have become the leading global & voluntary framework and include guidelines on project selection, use of proceeds, performance measurement and reporting
- **Sustainable bonds are flagged** and thus easier found in the SIX bond explorer and are published on a dedicated website

### Use of proceeds

**Projects with environmental benefits:**
- Renewable energy
- Energy efficiency
- Clean transportation
- Circular economy...

**Projects with positive social outcomes:**
- Affordable housing
- Access to essential services
- SME financing & microfinance
- Food security...

**Social Projects with environmental co-benefits or green projects with social co-benefits**
- Aligned with both the Green and Social Bond Principles

**Forward-looking and performance-based bond** where proceeds are intended to be used for general purposes (not use of proceeds, i.e. project/asset focused)

### Bonds

**Bonds receive a Green Bond Flag** if included in the Green Bond Database\(^2\) by the Climate Bonds Initiative (CBI) and by adhering to the “Green Bond Principles”

**No social bond yet at SIX – Social Bond Flag** feasible on demand

**Bonds receive a Sustainability Bond Flag** by “issuer commitment” and adhering to “The Sustainability Bond Guidelines”

**Bonds receive a Sustainability-linked Bond Flag** by “issuer commitment” and adhering to the “Sustainability-linked Bond Principles”

3. **Partnership with the Climate Bonds Initiative**
4. A New Opportunity – Sustainability-linked Bonds
5. Your Advantages at a Glance
Partnership with the Climate Bonds Initiative

**Partnership**
- SIX and the **Climate Bonds Initiative (CBI)** entered into partnership in 2018
- CBI is an international, investor-focused non-profit organization aiming to promote investment in **sustainable projects and assets**
- **CBI partners** include major banks, exchanges and countries, incl. Switzerland

**Visibility**
- The partnership allows SIX to give **green bonds** a **higher visibility**
- Bonds that are included in the Green Bond Database by CBI and are aligned with the “Green Bond Principles” by ICMA receive a **green bond flag**, facilitating the search for such bonds in the SIX **Bond Explorer**
- A [dedicated website](#) presents a list of all green bonds at SIX

**Ecosystem**
SIX promotes the development of a **robust sustainable bond market** by offering a **facilitated search** for flagged bonds, **reliable certification** by CBI as well as a **transparent and regulated market**

---
1. There is a “special flag” search functionality in the SIX Bond Explorer, facilitating the filtering for green bonds; Sources: SIX and CBI
The Climate Bonds Certification Scheme

Certification

Certification under the Climate Bonds Standard confirms full alignment with:

- **The Green Bond Principles** by ICMA
- **Mandatory requirements** for internal controls, use of proceeds, reporting and verification
- **The Paris Climate Agreement** and the 2-degree global warming target

Taxonomy

The Climate Bonds taxonomy identifies assets & projects needed to deliver a low carbon economy.

Currently, projects in the following sectors\(^1\) can be certified:

- **Energy** (solar, wind, geothermal, bioenergy, marine renewables)
- **Transport** (private/public transport, freight rail)
- **Water**
- **Buildings** (residential/commercial)
- **Land use & marine resources** (commercial forestry, ecosystem conservation)
- **Waste** (recycling, waste to energy, etc.)

Mutual Benefits

**Issuers**

1. Investor demand and diversification
2. Positive reputational impact
3. Leadership and early adopter

**Investors**

1. Lower costs on due diligence\(^2\)
2. Transparency and consistency
3. Deeper engagement with the issuer

---

1. More certifiable projects and assets are under development.
2. The climate bond certification lowers due diligence costs by reducing the burden for investors having to make judgements on the green attributes of green-labelled investments.

Sources: CBI and ICMA
The Climate Bonds Certification Process

1. Prepare the bond
   - Identify assets that meet the relevant sector criteria under the Climate Bonds taxonomy
   - Compile supporting information
   - Create a Green Bond Framework, specifying the use of proceeds

2. Engage a verifier
   - Engage an approved verifier for pre- and post-issuance
   - Provide relevant information
   - Receive the verifier’s report assuring that Climate Bonds Standard requirements are fulfilled

3. Get certified and issue bond
   - Submit verifier’s report and information form to the Climate Bonds Initiative
   - Receive a decision on pre-issuance certification
   - Issue bond and list on SIX and use the Certified Climate Bond mark

4. Confirm certification
   - Submit verifier’s post-issuance report
   - Receive notification of post-issuance certification

5. Report annually
   - Prepare an annual report for term of the bond
   - Provide it to bond holders and Climate Bonds Initiative

Sustainability-linked Bonds are Performance-based...

Overview

- Sustainability-linked bonds (SLBs) are *forward-looking performance-based debt instruments* where the issuer commits to achieve predefined Sustainability/ESG objectives within a given timeline.
- *The proceeds are intended to be used for general purposes*, contrary to green/social/sustainability bonds that are use of proceeds focused.
- In June 2020, ICMA has published the *Sustainability-linked Bond Principles*.

Core elements

1. *Key performance targets (KPIs)* that are material to the issuer’s core sustainability/business strategy that address key ESG challenges of the industry.
2. *Sustainable performance targets (SPTs)* are derived from the KPIs and set the issuer’s targets, expressing the level of ambition the issuer commits to.
3. *Bond characteristics*: depending on whether the selected KPIs reach the predefined SPTs or not, the SLB will need to include a financial and/or structural impact involving a trigger event – a potential variation of the coupon is the most common example.
4. *Reporting* (pre- and post-issuance) by the issuer with up-to-date information on the performance of the selected KPIs.
5. *External and independent verification* of the issuer’s performance against the SPTs for each KPI.

---

1 Post-issuance verification is mandatory, whilst pre-issuance external review such as a second party opinion is solely recommended; Sources: ICMA
...And Foster Transparency and Flexibility

Benefits
Sustainability-linked bonds (SLBs)
• Can be used to finance an issuer’s sustainability progress and transition
• Enables a consistent, transparent and simplified public communication of the sustainable strategic direction
• Offers a flexible sustainable financing solution with potential financial benefits

Case Study
• Novartis issued the first ever healthcare industry SLB on SIX in September 2020, further embedding ESG targets into the core of its business operations and addressing key global health challenges
• The SLB is linked to the 2025 Patient Access Targets by Novartis with the goal to increase patient reach in low- and middle-income countries with strategic innovative therapies by 200% and the Novartis Flagship Programs by 50%, resulting in a potential reach of over 24 million patients across therapy areas
• The EUR 1.85 billion zero coupon SLB contains a coupon step-up, i.e. the coupon increases by 25 basis points from 2026 onwards if Novartis fails to meet its targets
