

CONNEXOR Converter Service

Optimize Your Submission Workflow

CONNEXOR allows issuers to submit product reference data in Excel, XML, JSON, CSV and other structured formats and converts them into the IBT (XML) format using the CONNEXOR Converter Service.

CONNEXOR allows issuers to submit product reference data in Excel, XML, JSON, CSV and other structured formats and converts them into the IBT (XML) format using the CONNEXOR Converter Service.

Simplifying Product Submissions into CONNEXOR

The CONNEXOR Converter Service, developed in collaboration with Derizone AG, supports issuers by reducing complexity on the data submission process into CONNEXOR IBT. The current IBT XML submission process is enhanced by the possibility of submitting Excel, XML, JSON, CSV and other structured formats, which can also be user defined via the IBT Editor. The data submissions automatically trigger a conversion into the known IBT XML format, without the need to create the XML files in-house or enter data manually into the IBT Editor.

Operational Efficiency

This service supports issuers in automating the submission process of certain payoff structures or even the entire product universe. Due to the upload speed as a result of faster data processing and integration streamline workflows, issuers focus on value-added activities, save time and reduce manual efforts.

Data Formats in Scope

Flexible Integration Options

In addition to manual upload and REST upload API, Excel, XML, JSON, CSV and other structured formats can be sent as email attachments and the service will do the rest. This reduces integration cost and enables both semi- and fully automated workflows in a harmonized manner.

Pricing

Based on your individual needs, subscription-based packages are available depending on the number of product payoffs in scope and conversions required.
