

CONNEXOR Status API Service

Monitor the status of your CONNEXOR submissions across different services in a fully automated way via the CONNEXOR Status API, which provides both machine-to-machine (M2M) access and human-readable (and machine-readable) JSON responses.

Summary

This API allows issuers to track automatically whether the setup of instruments on different interfaces was successful. Further, it provides the corresponding feedback without the need of a separate manual access to the CONNEXOR platform. The search can be done via ISIN or Termsheet Id, for single or multiple instruments simultaneously.

This service is offered to issuers for instruments submitted via the CONNEXOR IBT interface.

Entitlement

Access to the CONNEXOR Status API is granted by allocating specific roles on the CONNEXOR User Administration page.

Once you have been granted the requested role, you can access the [CONNEXOR Status API documentation](#) in which you find additional information about the different endpoints, the schemas as well as examples.

Call Status Responses

The extent of product information you can search for, depends on the role you are granted. You can call responses for a single instrument or for multiple instruments at once by using the ISIN(s) or the Termsheet Id(s). To call a status response, use the following string, expanded by the appropriate endpoint:

<https://ibt.six-group.com/issuers/services/connexor/ibt2/api/termsheet/v1>

ISINs	<code>/isin/<ISIN>/status</code> → Returns status of latest termsheet with a given ISIN
	<code>/isin/statuses?isin=<comma separated list of ISINs></code> → Returns status of latest termsheets with given ISINs
Termsheets	<code>/termsheetid/<termsheet_id>/status</code> → Returns status of a termsheet with a given termsheet id
	<code>/termsheetid/statuses?termsheetid=<comma separated list of term sheet ids></code> → Returns status of termsheets with given termsheet ids

Current Service Offering

- CONNEXOR Status
- SIX Swiss Exchange Listing Status
- SIX Financial Information Opening Status

Planned Future Offering

- Clearstream D7 Opening Status
- Bloomberg Opening Status
- BME Listing Status
- Bondfloor Pricing Status
- IBE Event Status
- SFTA Course List Status
