

SIX Swiss Exchange

Your Source of Liquidity in Swiss Instruments

SwissAtMid

SwissAtMid is a service that offers all our participants best execution possibilities on all Swiss equities with price improvement over visible pricing on the exchange. Integrate this strong source of non-displayed liquidity in Swiss instruments to ensure the best possible outcome for your clients.

What is SwissAtMid?

SwissAtMid combines a non-displayed order book and an order type which allows execution of Swiss equities at the midpoint of the lit order book of SIX Swiss Exchange.

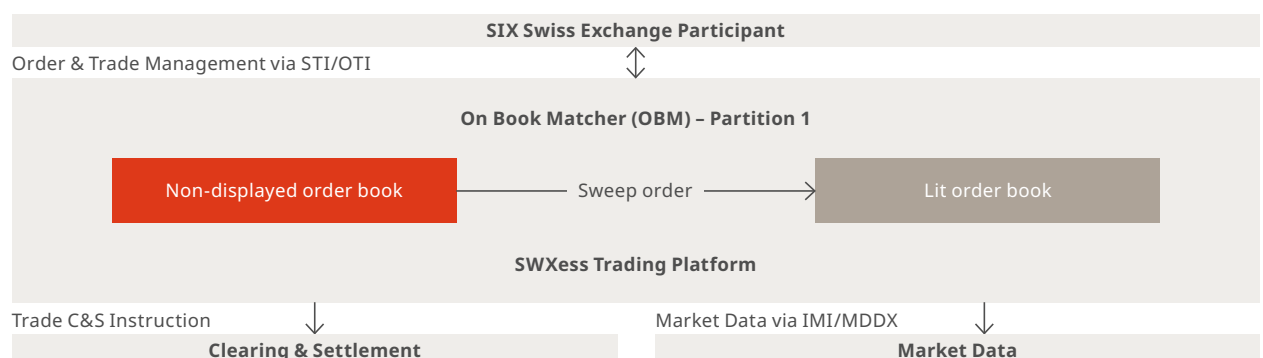

How Does SwissAtMid Work?

To access the non-displayed order book of SIX Swiss Exchange there are two options:

- Direct order – supports limit and market orders with day, IOC or Good Till Date validity
- Sweep order – will check for an execution in the non-displayed order book and then the lit order book of SIX Swiss Exchange. Non-IOC Sweep orders that do not execute in full will be entered into the lit order book.

Your Advantages at a Glance:

- Open to all Swiss Blue Chips and Small/Mid-Cap Securities
- Execution price is the midpoint of the lit order book of SIX Swiss Exchange
- Matching carried out based on size-time priority (larger orders have priority)
- Full support for Minimum Quantity on order entry
- All executions are done On Exchange
- Trading in Blue Chip instruments contributes to commitment levels
- Full CCP interoperability
- Published trades are clearly flagged to identify executions via SwissAtMid

The non-displayed order book is implemented directly in the same matching logic as the lit order book, so there are no drawbacks of using the Sweep order to check for additional midpoint liquidity on your orders.

Use “Plus”, Get More

With a single order, participants can access the best of both pools in multiple ways. Limit Plus is a completely unique new order type that allows participants to place their resting orders into both books simultaneously, so they will be fully visible in the lit order book, but also fully available for execution in SwissAtMid. The enhanced version of our iceberg order, the Iceberg Plus, allows you to take advantage of the deep pool of liquidity available in SwissAtMid. You'll be able to interact with passive Iceberg Plus orders on the opposite side of the order book, crossing at mid-point.

Direct Order to SwissAtMid

- Full support for all order time validity – OTI supports day, IOC and FOK orders, STI also supports multi-day Good till Date (GTD) orders
- Minimum Quantity is available to allow members to ensure minimum sizes for fills
- All executions are guaranteed to be the true midpoint of the lit order book of SIX Swiss Exchange

Key Figures for SwissAtMid

- Largest pool of liquidity among non-displayed and periodic auction venues in Swiss equities in 2022 (with market share of 28.4%, over 10 percentage points more than the second largest venue)
- CHF 13.6 bn traded in Q1 2023 and more than CHF 350 bn traded since launch
- Over 400 price moves can happen between getting an IOC order returned to London, and sending an order back to Zurich to trade in the lit order book. With a Sweep order, this can be done in one step greatly lowering risk of price movement
- Price improvement of 2.5 bps for Blue Chips and 12.1 bps for Mid & Small Caps in Q1 2023
- Strong growth of block liquidity since launch. Orders with a size larger than LIS thresholds account for 23% of turnover in March 2023
- Median time in-limit to first-fill for below LIS resting orders of 2 seconds in Blue Chips and under 6 seconds for Mid & Small Caps in March 2023
- Average trade size is CHF 16,212 in March 2023
