

# Connectivity Selection

Key criteria for choosing the type of connectivity are the chosen interface as well as the required exchange services and transmission capacity. The following table gives an overview of the common business models, together with suitable interfaces and connectivity types. The interfaces recommended for a particular model are marked with a dot. Suitable connectivity types are marked with a tick.

## Participants' Business Model

	Retail Banking/ Price Taker	Market Making	Algorithmic Trading	Trade Reporting
<b>Available Interface</b>				
Standard Trading Interface (STI)	•			•
Market Data Interface (MDI)	•	•	•
