

Trading Solutions

World-Class Order Management

Your Technology Partner with a Strong Client Focus

Covering over 50 Markets and Platforms

Trading Solutions currently covers over 50 markets and platforms for equities, fixed income, derivatives, and investment funds and offers well-developed and multi-functional trading tools.

We develop our software based on state-of-the-art technology as well as tools to develop robust and modular systems that can be integrated through a raft of high-performance interfaces.

Unique Swiss Expertise

Hosted in Switzerland and supported by highly qualified local client support, Trading Solutions provides full SIX functionality covering all asset classes, order books and order types of the Swiss stock exchange (in addition to other EU markets).

Attractive Conditions

Trading Solutions offers attractive conditions which include free delivery of all exchange releases and dedicated Relationship Managers focused on fulfilling customer needs.

Operated by BME, a SIX company, Trading Solutions offers a wide range of plug & play products and services to provide highly modular and flexible access to Trading Venues and Brokers.

Key Benefits of using Trading Solutions

- Strong customer focus
- All-in-one solution
- Full SIX Swiss Exchange functionality
- All Exchange releases delivered free of charge

“ At our core, we prioritize a client-centric approach in everything we do. Understanding and addressing our clients' needs is the driving force behind our technology solutions for the trading industry. ”

Alejandro Pita, Head Cross Services

Products available in Switzerland – all three integrated in one OMS

Trading Solutions offers an OMS together with two additional interesting products that can be purchased separately or together based on your needs, since they can be all integrated for a complete solution. Our main goal is to focus on our clients' needs and provide you with new possibilities for your strategy and success. With more than 25 years of experience in different countries, we offer the following three products in Switzerland.

neXus

The Order Management System (OMS) is a modular system, based on open-source technology that is fully configurable and adaptable to the specific needs of each client. neXus covers all the functions necessary for Buy-Side and Sell-Side trading: wide network of exchanges and brokers, algorithms, care order management, retail orders, a flexible drop-copy and integration with third party systems. One of our most special features of neXus is our flexible drop-copy, ready to adapt data in any way our clients need.

eBroker

Wide portfolio with interactive widgets and options for webpages and apps. From one ticker to a complete web page, we organize, consult and plan the needed details to connect with your clients online.

eTerminal

Your retail terminal for best executions and greater transparency. As a per-detailed platform, we arrange connectivity and connected through the OMS, your clients can trade with one click, full visibility and user-friendly options.
