SIX is new partner of ETH ZISC

Data protection and security are of utmost importance to SIX as the main infrastructure provider for the Swiss financial center. In the constantly and rapidly changing world of IT, security requirements must be geared to changing situations and to the future. In its latest venture, SIX plans to work more closely with the Swiss Federal Institute of Technology Zurich in order to be even nearer to the beating heart of research. A twelve-year research cooperation agreement with Zurich Information Security and Privacy Center (ZISC) at the ETH was sealed yesterday, making it an active cooperation partner for future projects and developments.

This commitment on the part of SIX will underpin education and research in the area of information security and contribute to the future security and reliability of IT systems, data security and protection against undesirable access by third parties. Special focus will be placed on the area of cybersecurity and innovation in the Cloud.

The commitment of SIX and other sponsors, in conjunction with the ETH Zurich Foundation, will allow the ZISC to operate its OpenLab, which aims to promote the central exchange of ideas and information between researchers at the ETH and partners in business. SIX will be actively involved with the ETH-ZISC OpenLab.

Prof Lino Guzzella, President of ETH Zurich: «We are pleased that we have managed to win such a strong partner in the field of finance. As our society and the business world become more digitally connected, we face an increased risk for the misuse of data and cybercrime. A closer cooperation between business and research is necessary. The ZISC competence center offers the ideal platform to facilitate such a collaboration.»

Dr Urs Rügsegger, Group CEO of SIX states: «The central role of financial market infrastructure makes it crucial to protect against all forms of cyber risk. Collaboration with the ETH should enable us to achieve and maintain top IT security standards.»

If you have any questions, Jürg Schneider, Media Relations, will be happy to help.

Swiss Federal Institute of Technology Zurich (ETH)

The roots of the Swiss Federal Institute of Technology Zurich go back to 1855, when the founders of modern-day Switzerland created this hub of innovation and knowledge. The ETH's environment encourages students to think independently and inspires researchers to achieve excellence. Its 500 professors teach around 20,000 students – including 4,000 doctoral students – from more than 120 countries. The ETH registers 90 patents and 200 inventions every year. It has given birth to 330 spinoff companies since 1996.
