Content of this message:

- **TRADEcho becomes a recognized Trade Data Monitor by SIX Swiss Exchange**

SIX Swiss Exchange has approved The London Stock Exchange Plc as a Trade Data Monitor (TDM) through its TRADEcho service.

This service is a partnership between BOAT Services Ltd and the London Stock Exchange, with Cinnober providing the core platform which will be integrated and hosted by the London Stock Exchange.

The service enables foreign participants (Remote Members) of SIX Swiss Exchange to report their off-exchange (OTC) trades in Swiss securities admitted to trading on a Swiss trading venue via TRADEcho. TRADEcho will announce the formal implementation date which is expected to be in Q2 2017.

The existing BOAT service will eventually be decommissioned and this new approval will allow our existing participants currently using BOAT to continue to utilise the new platform. Once migration to the new service has been finalised the current authorisation of BOAT will be revoked.
