Annual report of SIX SIS Ltd

Increase in volume in the international securities business

SIX SIS Ltd recorded a slight increase in operating income on the previous year from CHF 146.5 million to CHF 147.1 million. The growth in cross-border settlement transactions and new customer funds offset the low interest rates and rise in client netting activities in the domestic market.

Numerous regulatory initiatives in Europe are creating a number of challenges with respect to the future framework and general conditions in the Securities Services business field. In the settlement business, the European Central Bank's (ECB) initiative "TARGET2-Securities" to set up a central infrastructure for settlement in Europe by 2014 represents an important step. SIX SIS Ltd is working closely with the ECB, the Swiss National Bank (SNB) and its clients to develop potential options for participation in the initiative.

Success despite low prices and interest rates

SIX SIS Ltd increased its operating income to CHF 147.1 million in 2010 from CHF 146.5 million in 2009. Although the number of cross-border settlement transactions increased by 16.7% to CHF 5.8 million, the total quantity of settlement transactions decreased from 28.8 million to 23.4 million. The main reason for this was the rise in client netting activities, where several small transactions are bundled into a single large transaction. The influx of new customer funds amounted to CHF 64.6 billion, 15.9% more than in 2009. The volumes held in client custody accounts fell slightly due to declining euro and dollar rates and the flat stock market performance of Swiss securities from CHF 2,859,554 million in 2009 to CHF 2,846,559 million in the year under review. Interest income remained at a low level due to the continually low interest rates. By the end of 2010, repo services were being provided to 174 clients, 16 more than the previous year. SIX Securities Group provides services for 61 markets across the globe, six more than in the previous year.

Annex to the financial statements 2010

1 Notes on business activities and workforce

1.1 General

SIX SIS Ltd's core business is the settlement of securities transactions as well as the safe custody and administration of securities both in Switzerland and abroad. As the national central securities depository (CSD), the company is a key element of the Swiss Value Chain in its home market, Switzerland. It provides securities settlement on a simultaneous, final and irrevocable delivery versus payment basis. In its role as an international central securities depository (ICSD), SIX SIS Ltd offers a wide range of tailor-made global custody services for clients in 61 markets.

To facilitate the settlement of securities transactions, particularly in cross-border business, national and international participants as well as foreign custodians hold accounts with SIX SIS. Interim financing as a means of guaranteeing the settlement of securities transactions is short-term in nature and provided on the basis of current accounts, without exception. The company does not engage in commercial financing.

The number of staff on a full-time equivalent basis was 321 people as at year-end 2010 (year-end 2009: 285). Since the financial year 2010, temporary staff have been counted in this headcount figure if the duration of their contract is greater than six months.

SIX SIS Ltd is licensed as a bank under Swiss law and supervised by FINMA.

1.2 Outsourcing

Wherever possible, SIX SIS Ltd uses the services of other affiliated companies of SIX Group.

Risk management for all of SIX Securities Group, which itself is a division of SIX Group, was performed by the affiliate company SIX x-clear Ltd. SIX x-clear Ltd is also a regulated bank and supervised by FINMA.

As of 1 April 2006, SIX Securities Group outsourced the operation and maintenance of its computer center to SIX Group Services Ltd. This outsourcing arrangement is governed by Service Level Agreements in compliance with FINMA regulations. Staff members of SIX Group Services Ltd are obligated to maintain banking secrecy.

1.3 Risk management

1.3.1 General

As a part of SIX Group, SIX SIS Ltd is an important pillar of the Swiss financial center, laying great emphasis on reliability and security, and thus creating the trust that is essential for the financial center's smooth functioning. The Board of Directors of SIX Group is responsible for risk. The Risk Committee of the Board of Directors of SIX Group is responsible for internal controls with respect to risk. The Board of Directors of SIX Group approves the risk policy and delegates risk management tasks.

Overall responsibility for risk management lies with the members of the Group Executive Board of SIX Group, which is supported at Group level by the specialized units Corporate Development (for strategic risks), Corporate Security Officer (for security risks) and Compliance Officer as well as the Finance & Risk division. SIX Group's risk control measures are executed by the Chief Risk Officer of SIX Group, who is independent of the line management structure. Risk management and controlling are monitored by the internal auditors.

The management of specific risks faced by SIX SIS Ltd is assumed by senior executives of SIX Securities Group. Risk controlling tasks specific to SIX SIS Ltd are assigned to the Risk Controlling unit of

SIX Securities Group. For this purpose, the risk management instruments are continually enhanced and adjusted.

1.3.2 Risk policy

The scope of SIX SIS Ltd's risk policy is determined by the risk policy of SIX Group, in which the principles and philosophy applied to various risks are set out. The risk policy precisely defines organization, structures, competencies, and responsibilities and provides the basis for dealing with different kinds of risk as well as outlining the readiness to assume risk. Thus, the risk policy constitutes the central framework for regulations and directives of the individual companies and for the risk categories.

1.3.3 Risk groups

1.3.3.1 Strategic risk and project risk

Strategic risks and project risks arise both from the implementation of SIX Securities Group's strategy and from the implementation of the strategies of the individual subsidiaries. They are the responsibility of the Group Executive Board as well as of the Executive Boards of the subsidiaries.

Strategic risks and project risks are not directly quantified; the risk profiles of the individual SIX Group companies are, however, checked semi-annually.

1.3.3.2 Reputational risks

Reputational risk involves the risk of SIX Group's or one of its subsidiaries' reputation being tarnished. As reputational risk is inherent in business activities, reputational risk management mainly consists of ensuring competency, integrity, responsibility as well as compliance in business activities at a Group level. Reputational risk management includes all operational and strategic management instruments of SIX Group and SIX Securities Group, in particular financial reporting, monitoring of performance key figures as well as studies on customer and staff satisfaction. Reputational risks are not directly quantified.

1.3.3.3 Counterparty risk (default risk, credit risk)

Credit risk, counterparty risk or default risk is defined as the danger of a loss caused by a counterparty not fulfilling its contractual obligations, i.e. a counterparty or a country becoming insolvent. This includes settlement risk or the risk of the counterparty becoming insolvent at the time when the transaction is settled.

SIX SIS Ltd pursues a conservative risk and credit policy. New participants of SIX SIS are required to meet strict regulatory standards. Inadequately regulated and supervised market participants, or institutions not subject to money laundering monitoring, are not admitted. Management is effected via limits granted to the participant by the relevant bodies within SIX Group pursuant to the competency rules. All limits are revised at least annually, taking into account the development of the participant's business, its market standing and its relationship with SIX SIS. An external credit committee consisting of specialists from reputable and internationally active Swiss banks is involved in the assessment of all applications. The limit granted mainly depends on the participant's rating, or on the collateral it provides. Limits are monitored on a daily basis.

SIX SIS Ltd is linked online and in real time with SIX Swiss Exchange as well as with the SIC/euroSIC systems. The system of real-time settlement of irreversible transactions on the basis of simultaneous delivery versus payment, which has been in operation for several years, offers the best guarantee of eliminating settlement risk. This system does not function for cross-border securities transactions. The resulting receivables from and liabilities towards banks are subject to counterparty risk and – to a limited extent, i.e. in the case of counterparty default – also market risk. These risks, which are of extremely short duration, are strictly monitored through procedures for checking and adjusting limits.

SIX SIS Ltd operates a system for the internal monitoring of cluster risks. As at 31 December 2010, one position exceeded the 10% reporting threshold for accumulated liabilities. The reporting threshold was not exceeded on a single occasion with regard to accumulated assets.

To calculate the capital adequacy requirements for credit risks in accordance with Basel II, SIX SIS Ltd uses the Swiss standard approach.

1.3.3.4 Non-counterparty-related risk

Non-counterparty-related risk is defined as the danger of a loss due to value changes or liquidation of assets that are not related to a specific counterparty. This category includes positions that concern the actual infrastructure for business activities. In particular, it includes office buildings, sundry tangible assets, software as well as other assets subject to depreciation.

Non-counterparty-related risks are accounted for through adequate depreciation as well as insurance; in particular software is written off in full in the year of production/purchase.

1.3.3.5 Market risk

Market risk is the risk of a loss due to value fluctuations of a position triggered by a change of underlying factors (e.g. equity or commodity prices, exchange rates and interest rates as well as their respective volatilities).

1.3.3.5.1 Interest rate risks

SIX Securities Group does not engage in credit transactions or in major mid-term or long-term fixed interest transactions. However, interest rate fluctuations may influence the treasury result.

1.3.3.5.2 Foreign currency risk

In principle, SIX Securities Group does not hold any foreign currency for its own account outside of OECD member states. Moreover, all receivables from and liabilities towards participants and custodians are matched by currency. Currency risks are generally limited to the net amounts from interest received and paid, commissions and fees.

1.3.3.6 Operational risk

According to Basel II, operational risk is defined as "the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events". The definition also covers all legal risks, including fines from supervisory bodies and settlements. Strategic risks and reputational risks, however, are excluded.

Operational risk management is a task assumed at all management levels. Operational risks are mainly limited by means of internal regulations and directives on organization and control. Additionally, it is mandatory to identify, assess and manage them continually. For this purpose, business process risks are systematically assessed by the internal audit department of SIX Group and adequate measures are elaborated. What is more, SIX Securities Group maintains a loss and risk database reflecting the risk categories defined by Basel II to systematically identify any risks in processes and to collect data to minimize losses in all business areas.

Together with the legal department, the compliance function ensures that the business activities of SIX Securities Group comply with the current rules and regulations as well as the financial intermediaries' general obligation to exercise due diligence. These entities are responsible for implementing the requirements and developments defined by supervisory bodies, the legislator, the jurisdiction and other relevant institutions. Furthermore, they ensure the adjustment of internal rules and directives are observed and amended in line with changing legal provisions.

The risk inherent in relying on information technology is addressed by SIX Securities Group's business continuity planning, which is in line with customary industry practice and measures aimed at reducing the probability of such failures occurring, such as by maintaining an IT backup center. Appropriate steps on the part of SIX SIS Ltd's outsourcing partners are subject to contractual agreements. SIX Securities Group is also supervised by the Swiss National Bank in this respect pursuant to specific legal provisions.

Operational risks are backed with capital according to the basic indicator approach under Basel II.

1.3.4 Disclosure in accordance with circular no. 08/22 of the FINMA on capital adequacy disclosure

In accordance with margin notes 7 – 11 of FINMA circular 08/22, SIX SIS Ltd meets the requirements for partial disclosure.

Capital as at 31.12.2010 and 31.12.2009, respectively:

(CHF 1,000)	31.12.2010	31.12.2009
Eligible capital:	160,439	171,755
Total required capital:	48,648	60,771
thereof for credit risks:	16,971	25,755
thereof for non-counterparty-related risks:	9,745	10,308
thereof for market risks:	213	181
thereof for operational risks:	21,932	24,527

2 Principles of accounting and valuation

2.1 General principles

The accounting, reporting and valuation for the individual companies comply with the provisions of the Swiss Code of Obligations, the accounting guidelines of the Swiss banking legislation (BAG SFBC) and the accounting guidelines of the Swiss Financial Market Supervisory Authority (FINMA)

The financial statement reporting date is 31 December.

Transactions are entered according to the principle of settlement date accounting. Detail positions reported under a specific balance sheet item are valued individually.

2.2 Conversion of foreign currencies

Transactions in foreign currency are posted at the current exchange rates. Balance sheet items in foreign currencies are translated into Swiss francs at the exchange rates applicable on the balance sheet date, with the exception of items that were previously valued using historic rates (e.g. participations). Exchange rate gains or losses are credited or debited to the income statement.

Exchange rates

Currency	USD	EUR	GBP	JPY	HKD	CAD
Unit	1	1	1	100	100	1
Exchange rates as at 31.12.2010	0.93	1.25	1.45	1.15	12.02	0.94
as at year-end 2009	1.03	1.49	1.66	1.12	13.29	0.98

2.3 Liquid funds, borrowed funds

These items are shown in the balance sheet at their nominal value.

2.4 Receivables from and liabilities towards banks and clients

Receivables and liabilities in CHF are shown at their nominal values. Risks arising in respect of customer claims are taken into account in the balance sheet item "Valuation adjustments and provisions." Predictable risks of loss are accounted for through individual valuation adjustments and latent risks through flat-rate valuation adjustments calculated on the basis of clearly defined rates.

Receivables from and liabilities towards banks arise mainly from SIX SIS Ltd's clearing and settlement activities with banks and financial organizations in Switzerland and abroad.

2.5 Lending and repurchase transactions in securities

In accordance with the accounting guidelines, the substance over form principle applies for lending and repurchase activities with securities. Thus, non-monetary values are shown in the balance sheet of the party delivering these values.

2.6 Securities lending and borrowing transactions

SIX SIS Ltd lends and borrows non-monetary instruments such as money market papers or securities for its own account and risk (principal status). Basically, it only engages in trading book transactions, whereby receivables and liabilities arising from the lending or borrowing of non-monetary instruments are valued at market price. Lending transactions in securities or money market papers are treated like repo transactions, provided they are covered by cash collateral and are subject to daily margining. Lending transactions in securities or money market papers that are not covered by cash collateral are not included in the balance sheet, but shown in the Annex. Fees paid and received are shown under commission income rather than interest income.

2.7 Repurchase and reverse repurchase transactions (repo)

Repo transactions are shown in the balance sheet as cash deposits against pledge of own securities. Reverse repo transactions are treated as loans covered by securities collateral. This emphasizes the nature of such transactions as financing instruments. The transfer of securities is treated as if the securities had been pledged as collateral to cover the loan.

2.8 Financial investments in securities

Financial investments are stated at the lower of cost or market value.

2.9 Fixed assets

The following depreciation rates are applicable:

Asset class	Lifetime in years maximum	Depreciation rate, linear, based on acquisition value
Installations	7	14.3 %
Building installations	10	10 %
Fixtures logistics	12	8.3 %
Furnishings and equipment	5	20 %
Vehicles	5	20 %
EDP hardware	5	20 %
Computer hardware	3	33.3 %
Computer software	immediate depreciation	100 %
Ordinary office buildings	35	3 %
Buildings for special uses	20	5 %
Real estate	not depreciated	0 %

Real estate and buildings are to be reported separately. Real estate is not depreciated. Fixed assets are reported on a net basis, i.e. after deduction of accumulated depreciation. Costs for proprietary software development are recognized in the balance sheet and fully written off within the same year.

2.10 Liabilities towards the pension fund

Liabilities towards SIX SIS Ltd's own pension fund as at 31 December 2010 amount to TCHF 0 (in 2009: TCHF 297). SIX SIS Ltd offers defined contribution plans.

2.11 Information on off-balance sheet transactions

Off-balance sheet transactions requiring disclosure concern derivative financial instruments. There were no contingent liabilities as at the balance sheet date. SIX SIS engages in transactions involving derivative financial instruments for its own account only to a very limited extent and for the sole purpose of hedging.

2.12 Valuation adjustments and provisions

2.12.1 Valuation adjustments and provisions for default risks (counterparty, customer and country risk)

Allowance is made for predictable risks of loss on the balance sheet date by means of individual valuation adjustments and provisions based on the accounting principle of prudence. Individual valuation adjustments are deducted directly from the corresponding asset item. Furthermore, flat-rate provisions are created to cover latent defaults in the area of short-term financing used to guarantee settlement of securities transactions. Provisions depend on the balances as at balance sheet date:

Account type	31.12.2010	31.12.2009
Nostro accounts	0.30 %	0.30 %
Placements (investments/receivables from third-party banks)	0.20 %	0.20 %
Short-term interim financing granted to participants on a blank basis	1.00 %	1.00 %
Short-term interim financing granted to participants on a covered basis	0.20 %	0.20 %

If the amount needed has increased year-on-year, it is charged to the income statement. If the amount is lower, the value of the previous year is used.

2.12.2 Valuation adjustments and provisions for other business-related risks (in particular settlement risks)

Latent settlement risks in the securities business are accounted for by flat-rate provisions for operational risks. These provisions amount to 2% of the net commission and services business income.

Actual losses resulting from settlement are allocated to existing provisions. However, realized settlement proceeds need to be reported under Other ordinary income.

2.12.3 Provisions in respect of safekeeping

The maximum provision is 0.0025% of the deposit value and the current provision is 3% of the net income from custody business. These provisions are dependent on the business result. If the maximum amount is reached or exceeded due to a decline in deposit value or share prices, no further provisions are made. However, the provision will remain unchanged in the balance sheet, even if one portion might have to be taken into account for tax purposes.

2.13 Amended principles of accounting and valuation

None

To the General Meeting of
SIX SIS Ltd, Olten

Zurich, 4 March 2011

Report of the statutory auditor on the financial statements

As statutory auditor, we have audited the financial statements of SIX SIS Ltd, which comprise the balance sheet, income statement and notes (pages 4 until 16), for the year ended 31 December 2010.

Board of Directors' responsibility

The Board of Directors is responsible for the preparation of the financial statements in accordance with the requirements of Swiss law and the company's articles of incorporation. This responsibility includes designing, implementing and maintaining an internal control system relevant to the preparation of financial statements that are free from material misstatement, whether due to fraud or error. The Board of Directors is further responsible for selecting and applying appropriate accounting policies and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Swiss law and Swiss Auditing Standards. Those standards require that we plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers the internal control system relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control system. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements for the year ended 31 December 2010 comply with Swiss law and the company's articles of incorporation.

Report on Other Legal Requirements

We confirm that we meet the legal requirements on licensing according to the Auditor Oversight Act (AOA) and independence (article 728 CO and article 11 AOA) and that there are no circumstances incompatible with our independence.

In accordance with article 728a paragraph 1 item 3 CO and Swiss Auditing Standard 890, we confirm that an internal control system exists, which has been designed for the preparation of financial statements according to the instructions of the Board of Directors.

We further confirm that the proposed appropriation of available earnings complies with Swiss law and the company's articles of incorporation. We recommend that the financial statements submitted to you be approved.
