Gnepf – internal working group with the objective to dismantle the 13 barriers in short term; European Issuers/J. Beglinger: it is also on their agenda, but no news yet;</p> <p>-<i>Conclusion swissSPTC</i>: (i) ISO20022 will be handled autonomous within FK Securities, secondly the proposal will be agreed in SPTC (Conf Call if possible?); (ii) generally whenever there are news from the associations they will forwarded as update information to SPTC members</p> <p><u>Update after SPTC meeting:</u> <i>ECB/T2S will answer separately (draft in circulation at T2S HSG); ECSDA will answer only on CSD relevant questions/issues</i></p> <p>EU-Consultation on 12 EPTF Barriers (closed 15 Nov)</p> <ul style="list-style-type: none"> - AFME & EBF overall in agreement with proposed barriers to be dismantled (no specific swiss feedback on ISO 2022 has been taken in) ->overall comment in the industry is "in agreement", but also a relatively small number of responses that have been sent - ECSDA primarily answered on issues that are relevant for CSDs; ISO20022 Swiss market input has been discussed, but no common agreement reached to take it fully into the report

Fact is, SIX SIS is ready and banks do not have to wait with a/c structure setup until FMI authorization</p> <p>- Still confident that SIX SIS will get the FMI license very soon. - Working Group of SwissBanking will very soon publish a disclosure document on FinfraG Art 73(4) an CSDR Art 38(6) on levels of protection associated with the different levels of segregation in respect of securities held in the accounts. AG FinfraG: Draft will be translated in additional languages and published from SwissBanking; there will no indications about cost transparency as this is different from bank to bank and a commercial issue as well in case of different setups/flat fee arrangements in the custody area. SIX Exchange got FMI license in Nov 2017; SIX x-clear FMI license expected in Q1/Q2 2018; SIX SIS got FMI license in Sep 2017 -> with subsequent equivalence request to ESMA on CSDR</p>

<p>Fund Regulation</p> <p><i>Regulating the investment fund industry</i></p> <p>AIFMD / UCITS V</p> <p><i>Since 2013, the alternative investment industry has been regulated through AIFMD. There is a focus on investor protection and increased liability for depositories. This is also reflected on UCITS instruments through the 5th revision of UCITS Directive</i></p>	<p>Asset Segregation Rules Liability and new requirements for Depository Banks</p>	2016/12	Q4 2016 guideline from ESMA in terms of account structure expected -> pp to Q1 2017
		2017/03	6 March ESMA meeting in Milan to discuss final guidance concerning asset segregation; debate is closely linked to the debate on CSDR Art 38(5) -> also in the context of "Issuer CSD" and "Investor CSD" treatment -> Q2 2017 ESMA is expected to issue guidance to the EU Commission on segregation, omnibus in terms of custody function
		2017/06 2017/09	No news/no change so far, ESMA's guidelines still pending ESMA's Opinion published in July on A/c Segregation issues and on delegation of depository function to CSDs. - Acceptable position on a/c structure as ESMA at the end stepped back from a stronger segregation approach (could be a dilemma for some banks considering current EU Commission law and ESMA Opinion); next steps in this context not yet clear - "Delegation of depository function" is still under discussion within ECSDA -Opinion had been discussed/welcomed in AFME, but is considered/assessed as an "opinion" only. At the end requirements need to be changed/amended, but AFME will not push on this area. - SPTC confirmed: For the time being each Fund Depository Bank will take its own legal decision (e.g. until which level segregation makes sense from an asset protection point of view or principle) and instruct the involved subcustodians in the custody chain.
		2017/12	No further news, still uncertainty/dilemma: interpretation of EU regulation that could be different from the ESMA Opinion published in Jul 2017

In this context also the unharmonised shareholder/general meeting registration process was discussed incl. the registered shares process (Namenaktien). <i>Action point:</i> SIS to analyse its participation, and in parallel ask CAEG for agreement on the SPTC proposal (...or whether another institution would like to apply). Action Point: Candidate from SIX SIS has sent an Expert Group application, but has not been accepted (->as per our knowledge no third country has a seat in the expert group) -No information from ECSDA or Issuers yet (->depending from Expert Group); <i>Update after SPTC meeting: First meeting of the Expert Group was on 19 Sep; summary of the first meeting: There appears to be an agreement on the need to improve the current state of play; binding regulation is needed to bring improvement. Many solutions can be leveraged from the current market standards, although certain elements have not been addressed. Next meetings on 23 Oct. and 20 Nov. (-> above link in the middle column of this SRD table).</i> Background: Number of activities that are going on: -EU Comm Expert Group -Eurosystem Collateral Management Services ->looking on CA Processing and CA harmonisation in T2S -CAJWG further definition and harmonised monitoring with CASG Four work streams have been installed 1- Communications from the issuer, including meeting notice, list of agenda items 2- Entitlement, notice of participation and voting confirmation 3- Identification of shareholders 4- Financial corporate Actions ->Meeting on 13 Dec specific contents to the above work streams have been discussed/proposed</p>

R	<p>Swiss Regulation Federal Department of Finance in co-operation with FINMA are analyzing/preparing a consultation on <i>Segregation of proprietary and client assets of intermediated securities</i> Target is to close a legislative gap in the intermediary chain at least for the Swiss market and the first cross-border custodian/intermediary outside of Switzerland.
