

Availability Report December 2018

10.01.2019

Terravis

Explanation of the terms

WTTR

Worst Time To Repair. Time from the occurrence of an Incident to the restoration of an IT Service.

Availability

Ability of an IT Service to perform its agreed function when required. Availability is usually calculated as a percentage. This calculation is based on agreed Service Time and downtime during Service Time.

Σ Outages

Sum of all outages full and partial with service impact during service time.

full Outages

Only full outages with service impact during service time.

Service Time

The time during an IT Service is agreed to be available.

Creation Date

The date on which the report was generated with the previous day data.

SLA “Monthly”

Agreed SLA per month. Actual results see monthly columns.

SLA “Yearly”

Agreed SLA per annum. Actual accumulated results see column “Total”.

- No outage of the IT Service
- Outage without SLA breach
- Outage with SLA breach
